## Restoratively-Driven Implant Complications Prevention, Maintenance and Technical Solutions

**Alfonso Piñeyro, DDS**

**Friday, May 19, 2017 8:00 a.m. - 3:30 p.m.**

**Center for Meeting and Learning | Lane Community College | 4000 E. 30th Ave, Eugene**

**Includes breakfast & lunch ~ Annual Membership Meeting 12:30 p.m.**

A number techniques and products have been developed specifically for implant restorations; some are potentially detrimental to implants, with dentists not fully aware of the issues and implications of using an inappropriate material or method. Many of the restorative implant protocols that were developed early on, have changed over time. The goal is to examine these from a scientific based perspective and present up-to-date techniques that will be used to develop a suitable protocol for clinical practice. This full day lecture explores many of the problems encountered with cement selection, application techniques, implant occlusion, screw loosening, matching of implant components and gives clinical guidelines based on research that will ensure long-term success. Attendees will gain valuable and practical information that can be applied immediately to benefit their outcomes.

**Lecture Objectives:**

1. Define the importance of cement selection, understand what you need from a cement material.
2. Prevent loss of proximal contacts adjacent to your implant restorations.
3. Understand the important aspects of Implant Occlusion.
4. Evaluation of different restorative options for fixed and removable prosthetics and what to request from the dental laboratory.
5. Overview of implant screws and what to do to prevent problems.
6. Review of Abutment Design Principles.

### 6 CE credits

Free tuition for LCDS Members  
with advance registration.

Non-LCDS member dentists \$200

dental staff \$80, student/non-profit staff \$60

Course content is appropriate for general dentists, specialists, dental assistants and dental hygienists.

**Alfonso Piñeyro, DDS** received his dental degree from the Universidad Autonoma de Guadalajara and his specialist training in prosthodontics at the University of Rochester Eastman Dental Center. He currently is an affiliate instructor at the Department of Restorative Dentistry at the University of Washington. He is the past president of the Washington State Society of Prosthodontists and is also a member of the American College of Prosthodontists and the American Prosthodontics Society. Dr. Piñeyro has authored several publications in peer reviewed dental journals, chapters in textbooks and is currently involved in research focusing on dental implants. Dr. Piñeyro works in downtown Seattle, Washington in a practice limited to fixed, removable and implant prosthodontics.

### ADA CERP® Continuing Education Recognition Program

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Lane County Dental Society designates this activity for 4 continuing education credit. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at [www.ada.org/cerp](http://www.ada.org/cerp).

Lane County District Dental Society has been designated an approved PACE Program Provider by the Academy of General Dentistry. This program provider's formal COE programs are accepted by the AGO for membership maintenance, Fellowship, and Mastership credits. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of AGD approval extends from 1/16/2017 to 1/15/2020.

Educational programs are funded, in part, through the generous support of the following sponsors.
