Actions and Algorithms for Medical Emergencies: How to Save a Life (Including Your Own)

COURSE CONTENT

A **CRISIS SITUATION** can—and likely will—occur at some time in your practice.

Many potential medical emergencies can be prevented. Gain a comprehensive command of the essential knowledge and skills needed to handle a life-threatening medical crisis. There are more medically compromised patients coming to our offices than ever before. Acquire “up to the minute” actions for dealing with a medical emergency while challenging preconceived or outdated ideas. Daniel Pompa, DDS – Oral and Maxillofacial Surgeon, ADA Consultant and Seminar Series Speaker - discusses the prevention, preparation, recognition and management of medical emergencies. Delivered in an interactive, high energy, multi-media presentation frequently described by attendees as “highly informative,” “engaging,” and “exceptional.” A step-by-step medical approach using basic physical diagnostic methods is reviewed, giving the attendee a clear understanding of these medical findings.

- Discover three simple chair-side, non-invasive tests to help avoid an emergency
- Recognize the most frequent life threatening emergencies and know when and why they occur
- Review a systematic approach to treat the most common life-threatening scenarios
- Learn how to develop a plan for the office team when dealing with a crisis event
- Determine when to administer the essential “Top 10” emergency drugs
- Understand legal and moral obligations presented by medical emergencies
