9am-Noon: CE Program

Course Fee:

\$75 Member Dentists
\$45 Dental Team
\$150 Non-Member Dentists

The Southwest Dental Society is an approved continuing education provider by the Missouri Dental Board.

Dr. Howard Shayne presents OSHA & Infection Control

The OSHA Bloodborne Pathogen Standard requires that employers who have employees with occupational exposure to blood and other potential infectious material provide training for those employees annually. In addition, for DANB Certified Dental Assistants, two hours of infection control and one hour of OSHA's Bloodborne Pathogens credits is required annually. This course covers both areas of required training. The OSHA standard contains fifteen elements that will be addressed in the training. The major exception is that the standard does not require an annual review of the employer's exposure control plan. This portion of the requirement will need to occur in the participants' individual office setting. However, a discussion of the elements required in all plans will be included. The course will provide 3 hours of CEU (2 hours IF & 1 hour BBP).

Objectives:

- Be aware of safety issues involved in dental care,
- Be able to apply modern infection control principals
- Be knowledgeable about requirements of the OSHA Bloodborne Pathogens Standards
- Be able to critically analyze different methods for instrument decontamination
