An Event for the Entire Dental Team

PREVIEW PROGRAM
Welcome to the 2018 Oregon Dental Conference®, an event for the entire dental team! Our 126th annual meeting will be held at the Oregon Convention Center in Portland, April 5–7, 2018. The conference has something for everyone and I encourage all friends of dentistry to attend. Come and enjoy this educational and team-building experience with your colleagues – guaranteed to support personal and professional success.

We are pleased to welcome back our partner groups: the Oregon Academy of General Dentistry (OAGD), the Oregon Academy of Pediatric Dentistry (OAPD), the Oregon Association of Dental Laboratories (OADL), the Oregon Dental Assistants Association (ODAA), the Oregon Dental Executives’ Association (ODEA), the Oregon Dental Hygienists’ Association’s (ODHA), the Oregon Society of Oral and Maxillofacial Surgeons (OSOMS), the Oregon Society of Periodontists (OSP) and the Oregon State Association of Endodontists (OSAE).

This 2018 Preview Program provides an overview of activities and scientific course offerings, including an inaugural, hands-on, cadaver lab. Thursday’s Solutions Marketplace Grand Opening Reception will offer you the chance to win some fabulous prizes! And please join me on Friday morning for the ODC General Session where Tim Gard will present an entertaining keynote address, Change the Game: Reduce Stress to Boost Morale and Teamwork!

With more than 150 booths offering dental industry experts and resources, the new Solutions Marketplace provides an enhanced exhibit hall experience. Bring your shopping list and support the exhibitors who support the conference – and ultimately the ODA.

You can register for the conference online at www.oregondentalconference.org. Be sure to register by February 23, 2018, to take advantage of the discounted fee. Your meeting confirmation, name badges and other information will be mailed to you in advance if you preregister.

Back by popular demand, please join me for a very special team event, All-In For Fun, on Friday evening. It is sure to have something for everyone to enjoy – dinner, drinks, music, dancing, casino games, and fantastic prizes! This evening of fun is graciously sponsored, in part, by Delta Dental of Oregon.

I look forward to seeing you at the 2018 Oregon Dental Conference, April 5–7.

Sincerely,

Bruce Burton, DMD
ODA President

The Oregon Dental Conference® is the annual session of the Oregon Dental Association.
This official Preview Program will give you information about the many activities and courses that are scheduled during the conference.

Registration for the ODC is now open. Register by February 23 to take advantage of our early bird pricing.

Visit www.OregonDentalConference.org to reserve your spot today. See page 43 for more information and other ways to register.

Get the ODC App!

All the ODC information you will need, up-to-date, and at your fingertips:

- Schedule
- Course Info
- Locations
- Handouts
- Maps
- Exhibitor Info
- CE Verification System

Scan this QR code, or search ‘Oregon Dental Conference’ in your device’s app store.

Find everything you need to know about the Oregon Dental Conference inside this Preview Program!

Important Dates & Deadlines

FEBRUARY 23 Preregistration Deadline Register by February 23 to receive a tuition discount and conference materials prior to ODC.

MARCH 15 Hotel/Lodging Cut-off Discounted ODC rates are available at multiple hotels through March 15. See page 41 for details.

MARCH 22 Course Handouts Online Course handouts will be available online at www.oregondentalconference.org and through the ODC Mobile App, starting two weeks prior to the conference. Handouts will not be printed for distribution on-site. If you wish to have ODC handouts available for reference during courses, please be sure to download them in advance.

MARCH 23 Refund, Transfer, and Cancellation Deadline All refund, transfer, and cancellation requests must be submitted in writing. If cancellation occurs after preregistration materials have been mailed, badge(s) must be returned with the written request. A $25 handling fee will be charged for all refunds. Refund requests will not be granted, for any reason, after 11:59 PM on March 23, 2018.

MARCH 23 Mail/Fax Registration Closed Anyone registering after March 23 must register online or on-site in Pre-Function A of the Oregon Convention Center.

APRIL 5–7 On-site Registration Registration will be available in Pre-Function A at the Oregon Convention Center during the hours listed below. Dentists who are not members of ODA will need to show their ADA card to receive the ADA member rate.

### COURSES AT A GLANCE | SATURDAY

**Saturday — Full Day Courses**

- **Patient Care in the Digital Dental Office**
  - Course Number: 9170
  - CE Credits: 6
  - Presenter(s): Guichet
  - Time: 8 AM - 4 PM
  - Groups: ODA, D, H, A, OM, LT

- **Coordinated Management of Office Anesthetic Urgencies: A Program for the Doctor and Staff**
  - Course Number: 9174
  - CE Credits: 6
  - Presenter(s): Lieblich
  - Time: 8 AM - 4 PM
  - Groups: OSOMS, D, A

- **Esthetics and Implant Prosthetics: Avoiding Failures and Complications**
  - Course Number: 9175
  - CE Credits: 6
  - Presenter(s): Marchack
  - Time: 8 AM - 4 PM
  - Groups: OSP, D, H, A, LT

**Saturday — Morning Courses**

- **Who Are All These People?**
  - Course Number: 9163
  - CE Credits: 3
  - Presenter(s): Ahearn
  - Time: 8 - 11 AM
  - Groups: ODA, D, OM

- **Obstructive Sleep Apnea: The Evolving Surgical Algorithm for Management of Refractory Patients**
  - Course Number: 9164
  - CE Credits: 1.5
  - Presenter(s): Cheng
  - Time: 9:30 - 11 AM
  - Groups: ODA, D, H, A

- **Restorations for Our Pediatric Patients**
  - Course Number: 9165
  - CE Credits: 3
  - Presenter(s): Cohn
  - Time: 8 - 11 AM
  - Groups: ODA, D, H, A

- **CPR for the Health Care Provider**
  - Course Number: F1009
  - CE Credits: 3.5
  - Presenter(s): EMT Associates
  - Time: 8 - 11:30 AM
  - Groups: ODA, D, H, A, OM, LT

- **Demystifying Peri-Implant Maintenance: An Evidence-Based Approach**
  - Course Number: 9168
  - CE Credits: 3
  - Presenter(s): Gibson
  - Time: 8 - 11 AM
  - Groups: ODHA, D, H, A

- **Predictable Endodontic Instrumentation and Obturation**
  - Course Number: 9172
  - CE Credits: 3
  - Presenter(s): Koch; Nasseh
  - Time: 8 - 11 AM
  - Groups: OSAE, D

- **Delivering W.O.W. Service**
  - Course Number: 9176
  - CE Credits: 3
  - Presenter(s): Mausolf
  - Time: 8 - 11 AM
  - Groups: ODEA, D, H, A, OM, LT

- **Top Trending Topics in Dentistry**
  - Course Number: 9178
  - CE Credits: 3
  - Presenter(s): Menage Bernie
  - Time: 8 - 11 AM
  - Groups: ODA, D, H, A

**Saturday — Afternoon Courses**

- **Practical Proven Prevention for Your Pediatric Patients**
  - Course Number: 9166
  - CE Credits: 3
  - Presenter(s): Cohn
  - Time: 1 - 4 PM
  - Groups: ODA, D, H

- **CPR for the Health Care Provider**
  - Course Number: F1010
  - CE Credits: 3.5
  - Presenter(s): EMT Associates
  - Time: 12:30 - 4 PM
  - Groups: ODA, D, H, A, OM, LT

- **GenRX: Uppers, Downers, and All Arounders**
  - Course Number: 9169
  - CE Credits: 3
  - Presenter(s): Gibson
  - Time: 1 - 4 PM
  - Groups: ODHA, D, H, A

- **Infection Control in Dentistry**
  - Course Number: 9171
  - CE Credits: 3
  - Presenter(s): Jorgensen
  - Time: 1 - 2:30 PM
  - Groups: ODA, D, H, A, OM, LT

- **Communication Solutions: Attitudes, Breakdowns, and Conflict Resolution**
  - Course Number: 9177
  - CE Credits: 3
  - Presenter(s): Mausolf
  - Time: 1 - 4 PM
  - Groups: ODEA, D, H, A, OM, LT

- **Beyond Straight Teeth: Maximizing Oral Health for the Orthodontic Patient**
  - Course Number: 9179
  - CE Credits: 3
  - Presenter(s): Menage Bernie
  - Time: 1 - 4 PM
  - Groups: ODA, D, H, A

- **Advanced Communication Skills for Dental Teams**
  - Course Number: 9181
  - CE Credits: 3
  - Presenter(s): Murphy
  - Time: 1 - 4 PM
  - Groups: ODA, D, H, A, OM, LT

### Here are just a few highlights of our many great courses:

**CPR FOR THE HEALTH CARE PROVIDER.** For your convenience, this course is offered twice daily on Thursday, Friday, and Saturday. (See course numbers F1001, F1002, F1006, F1007, F1009, and F1010.)

**ODA EXPERT EXPRESS LECTURE SERIES.** These CE sessions, presented by Oregon Dental Association members, are shorter than our other classes at 1 and 1.5 credits, and cover topics for dentists, hygienists, and assistants. (See course numbers 9101, 9106, 9153, 9159, 9164, and 9173.)

**GENERAL SESSION.** Tim Gard will present his humorous, motivational keynote at 7:30, Friday morning. Everyone is welcome and encouraged to attend. (See page 42 for more information.)

**RISK MANAGEMENT.** Fulfill your risk management CE requirements for the 2017–2019 reporting period. (See course 9131 / F1004 on page 15.)

**WORKSHOPS**

- **Thursday Afternoon:** Creating Predictable Restorations: Crown Lengthening (See course F1003 on page 13.)

- **All Day Friday:** Cone Beam CT Dissection of the Head and Neck (See course F1005 on page 16.)

- **Friday Afternoon:** KiWMethod® Hands-On Workshop: Minimally Invasive Gingival Grafting (See course F1008 on page 20.)

**PARTNER GROUP COURSES**

ODC offerings included a variety of courses brought to you by our partner groups, including OADL, ODAA, ODEA, ODHA, OSAE, OSOMS, and OSP. To find these courses, see the ‘group’ column in the tables above, or look for the headings within the course listings on pages 10–27.
ODA EXPERT EXPRESS LECTURE

Dental Trauma
Pearls and Pitfalls from Splinting to Definitive Reconstruction

PRESENTED BY Melissa Amundson, DDS
RECOMMENDED FOR D H A 0M
10:30 AM - 12 PM  COURSE NUMBER 9101  ODA course  CE CREDITS 1.5

This course will cover all aspects of dento-alveolar trauma, from the luxated tooth to composite defects of the maxilla and mandible. We will discuss the treatment of basic dental injuries, short, and long-term complications. In addition, we will discuss when to refer to which specialist. The course will take the participant through alveolar grafting, large and small combined with dental implant restoration in the trauma patient and the sequencing of grafting, harvesting, and dental implant placement will also be covered. Finally, the presentation will take the participant through the reconstruction process for large composite defects secondary to traumatic injuries. This will include a discussion in the use of zygomatic implants and fibula free flap. “Jaw in a day,” type cases.

At the conclusion of this course, attendees will understand:
- Review of basic tooth saving techniques
- Treatment flow of when to refer and to whom
- The most current bone grafting techniques and tissue

Medical Emergency Update

PRESENTED BY Steven Beadnell, DMD
RECOMMENDED FOR D H A 0M
1 - 5 PM  COURSE NUMBER 9102  ODA course  CE CREDITS 4

Medical emergencies can and do occur in dental practices every day. Over the next 15 years the segment of the population at highest risk for medical emergencies — those 65 and older — will become a larger percentage of our patients. The entire dental team must be prepared to recognize and respond to a variety of medical emergencies that could be precipitated by the stress of the dental environment. This course will discuss the diagnosis, prevention, and management of common medical emergencies that might occur in dental offices. This four-hour course is appropriate for the entire dental team and meets the medical emergency education requirement of the Oregon Board of Dentistry for license renewal and anesthesia permits.

At the conclusion of this course, attendees will:
- Be able to identify those at increased risk for specific medical emergencies
- Be able to diagnose the common medical emergencies based on the signs and symptoms demonstrated by a patient
- Develop a rational approach to the management of medical emergencies in general as well as the specific protocols for managing each medical emergency discussed
- Be able to identify modifiable risk factors for medical emergencies and understand methods to prevent their occurrence in the dental environment

ODA COURSE

The Value of Dental Assistants
Insights and Opportunities

PRESENTED BY Stacy Bone, EFDA
Cynthia Durley, MEd, MBA
Teresa Haynes
Ginny Jorgensen, CDA, EFDA, EFODA, AAS
Natalie Kaweckyj, LDA, RF, CDA
Mariah Craner, MA, PhD

This three-hour educational session will include two 75-minute educational segments that take a deep dive into current trends related to dental assistants and the value they bring to the dental practice. We will explore the dental assisting career ladder and educational and credentialing opportunities, segmented by a 30-minute wellness topic on stress/lifestyle management.

At the conclusion of this course, attendees will understand:
- The role dental assistants play in infection control
- The importance of lifelong learning and the value of certification and continuing education in dental assisting careers
- Manage stress, anxiety and body aches from working equipment
- Be able to identify modifiable risk factors for medical emergencies and understand methods to prevent their occurrence in the dental environment
- Be able to diagnose the common medical emergencies based on the signs and symptoms demonstrated by a patient
- Be able to identify modifiable risk factors for medical emergencies and understand methods to prevent their occurrence in the dental environment

**This course appears to meet the Oregon Board of Dentistry’s requirements for CE related to practice management and patient relations.

ODA EXPERT EXPRESS LECTURE

Adequate Record Keeping,
Board Updates, and the Enforcement Process

PRESENTED BY Daniel Blickenstaff, DDS, MSc
Paul Kleinstub, DDS, MS
Stephen Prisby

RECOMMENDED FOR D H A 0M
9 AM - 12 PM  COURSE NUMBER 9103  ODA course  CE CREDITS 3

An overview of current relevant topics relating to the Dental Practice Act and the safe practice of dentistry in Oregon, including Board updates regarding new statutes, rules and Board workgroups. The executive director, chief investigator and investigator will give a brief overview of current issues facing the Board that directly impact licensees and relevant stakeholders. A review of common complaints, how to avoid complaints and the Board’s process for dealing with complaints will be reviewed, followed by a question and answer session.

The attendees will come away being better informed on important recent changes in rules, the processing of complaints and the Board’s interaction with licensees practicing dentistry in Oregon.

Being a Medicaid Provider in an Era of Accountability

PRESENTED BY Charles Czerepak, DMD
Allen Finkelstein, DDS
Steven Geiermann, DDS
Sidney Whitman, DDS

RECOMMENDED FOR D H A 0M
9 AM - 12 PM  COURSE NUMBER 9105  ODA course  CE CREDITS 3**

Despite misconceptions and fears associated with being a Medicaid provider, treating this population can be rewarding and not cut adversely into your bottom line. Members of the ADA’s Council on Advocacy for Access and Prevention (CAAP) Medicaid Provider Advisory Committee will share insights, opportunities and challenges regarding program integrity, compliance, fraud, advocacy and how better to safeguard your practice while providing care to this growing population in an era of increasing accountability and scrutiny. Special emphasis will be given to the importance of proper documentation of medical necessity.

At the conclusion of this course, attendees will:
- Implement efficient practice protocols to safeguard practice viability
- Protect oneself from unintentional non-compliance resulting in fraud allegations
- Recruit other Medicaid providers through positive advocacy and role modeling

**This course appears to meet the Oregon Board of Dentistry’s requirements for CE related to practice management and patient relations.

Five Things Every Dentist Needs to Know about the Maxillary Sinus

PRESENTED BY Eric Dierks, MD, DMD,
FAGS, FACP, FRSCS(Ed)

RECOMMENDED FOR D H A
1:30 - 2:30 PM  COURSE NUMBER 9106  ODA course  CE CREDITS 1

The location of the maxillary sinus just above the root apices is an unfortunate but unalterable circumstance for dentists and for our patients. The thin maxillary sinus floor can allow bacterial inoculation of the maxillary sinus through untreated dental disease or from dental instrumentation. Sinus lift or maxillary implant placement can flare up chronic maxillary sinus disease, possibly leading to acute infection and failure. Patients with pre-existing sinusitis of a bacterial or fungal nature are poor candidates for sinus lift and other implant related procedures until such underlying conditions are dealt with. Familiarity with the range of maxillary sinus disease allows better patient selection, preoperative preparation, perioperative management, and postoperative complication treatment, all of which translate into better outcomes for our patients. These five important concepts will help avoid complications and offer options should problems occur.

At the conclusion of this course, attendees will:
- Differentiate between viral, bacterial, and fungal sinusits
- Understand the significance of the ostiomeatal complex of the maxillary sinus
- Communicate with ENT consultants regarding the impact of dental disease on the maxillary sinus
- Appreciate the limitations that chronic sinus disease place upon the normal resiliency of the maxillary sinus

*This course appears to meet the Oregon Board of Dentistry’s requirements for CE related to practice management and patient relations.
The Acci-Dental Insurance Coordinator

PRESENTED BY Teresa Duncan, MS, FAADOM

RECOMMENDED FOR D OM

1:30 - 4:30 PM COURSE NUMBER 9107

ODA course CE CREDITS 3**

NOTE This course is also offered Friday afternoon.

CPR for the Health Care Provider

PRESENTED BY EMT Associates

RECOMMENDED FOR D H A OM LT

9 AM - 12:30 PM COURSE NUMBER F1001

ODA course CE CREDITS 3.5

NOTE This course is also offered on Friday and Saturday.

This is an American Heart Association class emphasizing the CABs of resuscitation, including rescue breathing, use of bag-valve mask, AED, CPR, and foreign body airway removal for all age groups. The workshop will include written and skills evaluations. Re-certification is for two years.

Course attendees will receive a copy of the American Heart Association’s required textbook, BLS for Healthcare Providers Student Manual. Please note, this text will only be distributed onsite to course attendees. It will not be available to registered individuals who are not present.

SPEAKER BIOS

Learn more about the presenter of a course, starting on page 28.

“RECOMMENDED FOR” KEY: D Dentists H Hygienists A Assistants OM Office Managers LT Laboratory Technicians

NOTE ON CE CREDITS: No partial credit will be awarded.
Infection Control in Dentistry

**PRESENTED BY** Ginny Jorgensen, CDA, EFDA, EFODA, AAS  
**RECOMMENDED FOR** D HA OM LT  
**9 AM - 12 PM**  
**COURSE NUMBER** 9114  
**ODA course** CE CREDITS 3  
**NOTE** This course is also offered on Saturday afternoon.

This seminar will include a combination of regulatory and non-regulatory guidelines. We will cover: OSHA bloodborne pathogens and hazard standards, Oregon Board of Dentistry infection control rules and regulations, CDC guidelines for infection control in dental health care Settings, the 2016 Summary of Infection Prevention Practices in Dental Settings – Basic Expectations for Safe Care, and “best practice” recommendations for safe dental procedures.

The importance of assigning a clinical infection control coordinator and maintaining dental unit water lines will also be presented. Compliance and safety is imperative for the modern dental practice. Attending this seminar will provide information to obtain and maintain this goal. Prior knowledge of bloodborne pathogens and dental office infection control is highly recommended as this course is meant as a review and update but not an introduction to infection control in dentistry.

At the conclusion of this course, attendees will be able to:
- Explain the difference between OSHA bloodborne and hazard standards
- Describe CDC recommendations for infection prevention in the dental setting
- Define a variety of diseases, their transmission mode and how they can potentially be transmitted in the dental setting
- Describe cross contamination and the best methods for prevention
- Explain the proper use, wear, and disposal of PPE
- Describe the proper methods for dental instrument processing, sterilization, and storage
- Demonstrate acquired knowledge by implementing infection control safety techniques in the dental office

Local Anesthesia Update

**PRESENTED BY** Solon Kao, DDS, FICD  
**RECOMMENDED FOR** D HA  
**9 AM - 12 PM**  
**COURSE NUMBER** 9115  
**ODA course** CE CREDITS 3  
**NOTE** This course is also offered on Friday Morning.

The last time we learned about local anesthesia was very early in our dental education. It is important for us to revisit this basic but extremely important topic in dentistry which – without it – would be extremely hard to perform endodontic treatment.

The last time we learned about local anesthesia was very early in our dental education. It is important for us to revisit this basic but extremely important topic in dentistry which – without it – would be extremely hard to perform endodontic treatment. Heat-treated NiTi rotary files have shown improved properties compared to non-heat treated NiTi rotary files. They can also be used in more challenging cases, give a better canal shape and have a slightly different feel when using them. This presentation will discuss the advantages and how best to use heat treated NiTi rotary files during endodontic treatment. It will also show cyclic fatigue, bending, and torsional tests comparing heat treated to non-heated treated NiTi rotary files.

At the conclusion of this course, attendees will:
- Know the difference between what is a heat-treated and non-heat treated NiTi rotary file and how heat treated NiTi rotary files can give superior results in endodontic treatment
- Learn about the cyclic fatigue, bending, and torsional test results comparing heat-treated NiTi rotary files to non-heat treated NiTi rotary files and its relationship to endodontic treatment
- Understand how heat-treated NiTi rotary files allow you to treat seemingly improbable endodontic cases compared to non-heat treated NiTi rotary files

Don’t Get Stressed Out! Get Funny!

**PRESENTED BY** Leigh Anne Jasheway, MPH  
**RECOMMENDED FOR** D HA OM LT  
**1:30 - 4:30 PM**  
**COURSE NUMBER** 9113  
**ODA course** CE CREDITS 3*  

Stress isn’t something you can brush or floss away, and unfortunately the dental profession has one of the highest stress levels of any organizational group. Too bad we can’t floss away the stress of everyday life! The good news is that stress isn’t something you can brush or floss away, and unfortunately the dental profession has one of the highest stress levels of any organizational group. Too bad we can’t floss away the stress of everyday life! The good news is that stress isn’t something you can brush or floss away, and unfortunately the dental profession has one of the highest stress levels of any organizational group. Too bad we can’t floss away the stress of everyday life! The good news is that stress isn’t something you can brush or floss away, and unfortunately the dental profession has one of the highest stress levels of any organizational group. Too bad we can’t floss away the stress of everyday life! The good news is that stress isn’t something you can brush or floss away, and unfortunately the dental profession has one of the highest stress levels of any organizational group. Too bad we can’t floss away the stress of everyday life! The good news is that you will enhance your reputation as a high-tech cosmetic dental practice.

At the conclusion of this course, attendees will be able to:
- Identify the physical and mental health consequences of overstressing
- Understand why the dental profession has such high levels of stress
- Recognize their own stress triggers
- Understand the benefits of laughter and play on managing stress and improving health
- Identify the four theories underlying why we laugh
- Differentiate between positive and negative (inclusive and exclusive) types of humor
- Recognize their ego voices and identify strategies for minimizing them when they create unnecessary stress

The Simple Approach to Occlusal Stability

**PRESENTED BY** Mark Kleive, DDS  
**RECOMMENDED FOR** D HA LT  
**9 AM - 12 PM**  
**COURSE NUMBER** 9117  
**ODA course** CE CREDITS 3  

The concepts of occlusion have most dentists confused. However, they really are simple. We just have to apply them appropriately for each patient. The most frequent questions posed by dentists include: Which teeth need to touch for stability? What bite (CR or IP) is appropriate for this patient? How do I know when to equilibrate? When is wear on teeth a problem? What do I do with the uneven edges of teeth? What do I do if the teeth are moving during function? This presentation will give you knowledge to easily plan and restore the “everyday” patients that are a large part of your practice. What’s more, you will be able to diagnosis and plan treatment with more ease and confidence for those “troubling” cases that sit on your lab bench top. At the conclusion of this course, attendees will understand:
- The contributing factors to occlusal disease
- When equilibration is important and when it is not
- The essentials of diagnosis & treatment planning for achieving occlusal stability
- When intercuspal position (IP) is the reasonable restorative position

A Picture is Worth Two Words: Case Acceptance

**PRESENTED BY** Mark Kleive, DDS  
**RECOMMENDED FOR** D HA LT  
**1:30 - 4:30 PM**  
**COURSE NUMBER** 9118  
**ODA course** CE CREDITS 3  

Digital photography sharpens communications with patients, your interdisciplinary team, and third-party payers. Its use also has a significant impact on a practice’s bottom line. This presentation will dramatically improve your diagnostic clarity, treatment planning, patient education and most important, treatment acceptance. With the skilful use of digital photography as a diagnostic and presentation tool, you will enhance your reputation as a high-tech cosmetic and restorative dentist. At the conclusion of this course, attendees will be able to:
- Succeed with 6 essential dental photographic images
- Successfully integrate digital photography into your practice
- Master the components of the collaborative oral health examination and discovery process
- Improve case acceptance with simple communication tools
How Crown Lengthening Will Enhance your Restorative Results

PRESENTED BY: James Kohner, DDS
RECOMMENDED FOR: D H A O M LT

9 AM - 12 PM  COURSE NUMBER: 9119
ODA course  CE CREDITS: 3

NOTE: This course is a prerequisite for Dr. Kohner's Thursday afternoon workshop (course F1003).

This program will illustrate and explain solutions to many everyday restorative problems, including fractured cusps, subgingival decay and gummy smile issues. It will provide valuable information to not just solve those problems, but its key goal is to enhance your restorative results. Experience an in-depth look at biologic width, plus flap and bone management factors, and how they have clinical implications and practical applications for both posterior and anterior crown lengthening. Some of the ideas discussed are also geared to improving communication between the restorative office and laboratory technician.

At the conclusion of this course, attendees will be able to:
- See how to achieve predictable impressions every time
- See why crowns come loose and how to prevent it
- Understand biologic width
- Understand causes of red gum tissue around crown margins
- Diagnose functional crown length needs
- Diagnose "gummy smile"
- Communicate more effectively with the periodontist and/or laboratory technician

Creating Predictable Restorations: Crown Lengthening Workshop

PRESENTED BY: James Kohner, DDS
RECOMMENDED FOR: D

9 AM - 12 PM  COURSE NUMBER: F1003
ODA course  CE CREDITS: 3

NOTE: Workshop attendees must also attend Dr. Kohner's Thursday morning lecture, "How Crown Lengthening Will Enhance your Restorative Results," (course 9119).

We will cover crown lengthening, including all principles and procedures for functional restoration of broken down or endodontically treated teeth. This workshop reviews the surgical techniques that were introduced in the required morning lecture course, including proper flap design, bone contouring, and suturing methods. You will do flap surgery and suturing on pig jaws, then you will also perform the required osseous recontouring on anatomically correct and suturing on pig jaws, then you will also perform the contouring, and suturing methods. You will do flap surgery morning lecture course, including proper flap design, bone surgical techniques that were introduced in the required course limit 25 participants.

ADDITIONAL FEE: $200

PREREQUISITE: Workshop attendees must also attend Dr. Kohner’s Thursday morning lecture, “How Crown Lengthening Will Enhance your Restorative Results,” (course 9119).

At the conclusion of this workshop, attendees will be able to:
- Understand proper flap and osseous management, plus suturing, for posterior teeth
- Review use of specialized instruments to accomplish the goal
- See how to get predictable impressions every time

Spit Happens (and Sometimes it Doesn’t) The Diagnosis and Treatment of Salivary Gland Disease

PRESENTED BY: Denis Lynch, DDS, PhD
RECOMMENDED FOR: D H A

9 AM - 12 PM  COURSE NUMBER: 9120
ODA course  CE CREDITS: 3

Disorders of salivary glands comprise a wide variety of diseases and conditions that affect patients of all ages. Neoplastic salivary gland diseases, while relatively uncommon, can have a significant impact on the long-term survival of affected individuals. Xerostomia is a frequently encountered clinical condition that may result from a variety of etiologic factors and have a profound influence on the quality of life. A variety of non-neoplastic salivary gland diseases are frequently encountered in clinical practice and must be differentiated from more serious conditions.

This course is designed to provide dentists, dental hygienists, and assistants with an overview of salivary gland diseases. Emphasis will be placed on the clinical recognition, diagnosis, and management of these entities.

At the conclusion of this course, attendees will:
- Be able to recognize the clinical features, diagnostic methods and treatment modalities associated with common and significant salivary gland neoplasms.
- Know the various etiologies and recognize the clinical features, diagnostic methods and treatment modalities associated with xerostomia.
- Recognize the clinical features, diagnostic methods and treatment modalities associated with common and significant non-neoplastic salivary gland diseases.

Infectious Hazards in Dentistry Or What You Never Thought You’d Have to Worry about after You Passed National Boards

PRESENTED BY: Denis Lynch, DDS, PhD
RECOMMENDED FOR: D H A

9 AM - 12 PM  COURSE NUMBER: 9121
ODA course  CE CREDITS: 3

In the course of formal dental and dental hygiene education, students study a variety of diseases and conditions with the expectation of never having to deal with them after the final examination is successfully passed. Over the past decade, there has been a dramatic increase in the number of infectious diseases of specific importance to dentistry. Disease prevention, timely diagnosis, and early therapeutic intervention have even more profound implications in an era of increasing numbers of affected patients and dental health care workers.

This course is designed to update members of the dental team on the more common and significant diseases and conditions that can be expected to occur in a modern dental practice. Emphasis will be placed on the clinical recognition, diagnosis, and management of those entities.

At the conclusion of this course, attendees will:
- Know and be able to recognize the clinical signs and symptoms of significant infectious hazards in dentistry
- Know the appropriate procedures to confirm the diagnosis
- Know the appropriate therapeutic modalities to treat the infections
- Know when a referral for treatment is appropriate and indicated

Childhood Sleep Disordered Breathing The Role of the Dental Team

PRESENTED BY: Ben Miraglia, DDS
RECOMMENDED FOR: D H A O M LT

9 AM - 12 PM  COURSE NUMBER: 9122
ODA course  CE CREDITS: 3

THIS COURSE REPEATS IN THE AFTERNOON:
1:30 - 4:30 PM  COURSE NUMBER: 9123
ODA course  CE CREDITS: 3

While childhood sleep disordered breathing is underdiagnosed, the awareness of it is growing. The manner in which a child grows and develops is directly related to the quality of their sleep. The quality of sleep may be affected by a level of airway compromise, which may be related to the growth and development of the maxilla and mandible. We recognize the high levels of malocclusion in children but we often miss the connection to how unhealthy they may be.

This course will connect the dots from malocclusion to the everyday symptoms that children and parents are struggling with. The dental team is uniquely positioned to evaluate and treat children as young as three years old to improve their overall health, growth and development.

At the conclusion of this course, attendees will be able to:
- Understand the history and origins of malocclusion
- Identify normal childhood head and neck development from birth to eleven
- Identify abnormal childhood head and neck development from ages three to eleven
- Understand the effect of muscle weakness and dysfunction on the development of the maxilla and mandible
- Understand the effect that an underdeveloped maxilla and mandible have on a child’s airway
- Identify the differences between nasal and mouth breathing
- Understand the relationship between a child’s airway and sleeping
- Understand the relationship between sleep disorder breathing and early childhood growth and development
- Understand optimal treatment timing between the ages of three and eleven
- Know what treatment options exist
- Understand the role of an orofacial myofunctional therapist
- Understand how myofunctional guidance appliances work
- Understand how to develop a child’s airway through collaboration
- Understand how these techniques impact the overall health and well-being of a child
- Know where to look for more educational opportunities

OSAE COURSE

Endodontic Diagnosis and Decision-Making in an Era of Advanced Technology

PRESENTED BY: Karan Replogle, DDS, MS
RECOMMENDED FOR: D
9 AM - 12 PM
OSAE course
CE CREDITS: 3

Cone beam computed tomography, periapical radiographs, electric pulp testing, dental microscopes, microsurgery; when is the technology essential and when is it simply complementary? What are the limitations? Using case based scenarios this session will explore the diagnostic challenges presented to today’s clinician and consider technological modalities that are best suited to guide the clinician to an accurate diagnosis.

At the conclusion of this course, attendees will be able to:
- Explore available advanced technology for endodontic diagnosis
- Identify when technology is essential and when it is complementary
- Identify the healthcare practitioner best suited to provide guidance and interpretation of the findings
- Formulate diagnoses and treatment options utilizing advanced technology

Microbes on Parade

The Amazing Roles They Play in Health and Disease

PRESENTED BY: Betsy Reynolds, RDH, MS
RECOMMENDED FOR: D H A
9 AM - 12 PM
ODA course
CE CREDITS: 3

Microbial organisms are phenomenal creatures capable of impacting our lives in a variety of positive and negative ways. Because the oral cavity contains the highest concentration of microbes in or on the human body, it is imperative that oral healthcare providers understand bacterial and viral dynamics in order to render effective care and provide patients with appropriate homecare recommendations. Microbiology – an often-daunting subject – will be presented in a relaxed, fun, dynamic manner that maximizes learning while providing truly amazing facts to ponder and incorporate into treatment strategies. Prepare to be amazed by the microbial world!

At the conclusion of this course, attendees will be able to:
- Understand microbial dynamics
- Relate bacterial cell wall structure to pathological potential
- Recognize how microbial resistance develops and impacts treatment protocols
- Understand biofilm dynamics in recombinant care treatment strategies

Headliners: Breaking News and Its Effect on Health Care

PRESENTED BY: Betsy Reynolds, RDH, MS
RECOMMENDED FOR: D H A
1:30 - 4:30 PM
ODA course
CE CREDITS: 3

As the dental patient population continues to become more aware of the impact overall health care strategies have on oral health, the dental hygiene professional needs to likewise keep abreast of breaking news involving dental, medical and other scientific breakthroughs in order to appropriately address patient concerns and develop truly comprehensive treatment plan protocols. Recent, potentially ground-breaking topics will be explored in an interactive, relaxed format utilizing a variety of information sources – from radio broadcasts, newspapers and television to refereed professional journals, popular consumer magazines and laboratory studies.

At the conclusion of this course, attendees will be able to:
- Recognize the potential impact of many recent research findings on the practice of dentistry and dental hygiene
- Discuss with confidence current topics of interest to the discerning dental patient
- Evaluate sources of information available to the consuming public based on validity and reliability
- Design in-office and at-home treatment strategies to reflect current research findings
- Incorporate relevant research into patient education recommendations

**This course appears to meet the Oregon Board of Dentistry’s requirements for CE related to practice management and patient relations.

Current Controversies in Implant Restorations

PRESENTED BY: Todd Schoenbaum, DDS, FACD
RECOMMENDED FOR: D LT
1:30 - 4:30 PM
ODA course
CE CREDITS: 3

This course will provide an updated discussion of some of the more controversial topics in implant restorations. Extensive time will be spent on looking at clinical results, tips and techniques, along with scientific evidence.

At the conclusion of this course, attendees will be able to:
- Understand how, when, and where to select cement vs. screw retained restorations; including advantages and disadvantages
- Learn when and why to splint adjacent implant restorations; updated evidence is changing our approach
- Learn simple and effective techniques for covering implant screws while eliminating foul taste and odor

Materials, Techniques, and Technologies for the Exceptional Dental Office

PRESENTED BY: Sam Simos, DDS
RECOMMENDED FOR: D A LT
9 AM - 12 PM
ODA course
CE CREDITS: 3

With today’s advanced restorative materials, success is dependent upon four major elements: technique, knowledge, accuracy, and team preparedness. This presentation will examine how each element plays a critical role in the success and longevity of your indirect and direct restorations when determining materials, systems and techniques.

At the conclusion of this course, attendees will be able to:
- Learn the newest techniques and technologies for placing direct restorations
- Learn about the newest bonding materials for direct and indirect restorations
- Learn about building a team approach to bonding while increasing value with patients for new materials
- Understand what you need to know about bonding systems and compatibility before you place your next direct or indirect restoration

Top Tips for a Better Dental Office

PRESENTED BY  Sam Simos, DDS

RECOMMENDED FOR  D H A OM

1:30 - 4:30 PM  COURSE NUMBER 9130

ODA course  CE CREDITS 3**

Great practices don’t just happen; they are planned, developed and fostered. Discover the secrets of top general dental offices around the country and what makes them function at such high levels. Regardless of location, talent pool, or socioeconomics, these offices outperform ‘regular’ offices in every category. This course is a favorite for the entire team: front desk, hygiene, assistant, and yes, even the dentist, take away valuable materials and systems to help make their offices even better.

At the conclusion of this course, attendees will be able to:
- Learn what Disney, Ritz Carlton Hotels, and your practice have in common
- Understand and explore the differentiators that make some dental offices exceptional
- Learn how to implement systems that make a difference in your team and your patients.
- Learn tips and tricks of materials, technique and technology you have in your practice now to catapult your practice.

COURSES BY DATE

THURSDAY, APRIL 5

Risk Management

PRESENTED BY  Christopher Verbiest

RECOMMENDED FOR  D H A OM

1:30 - 4:30 PM  COURSE NUMBER 9131 (part of ODC registration)

ODA course  CE CREDITS 3**

This course, updated for the 2017–2019 reporting period, will cover traditional risk management categories, an Oregon Board of Dentistry update, documentation, and ethics as well as other important topics.

Three hours of approved risk management education are required for continued membership in the Oregon Dental Association. Contact your malpractice carrier for dividend information.

At the conclusion of this course, attendees will be able to:
- Understand and explore the differentiators that make some dental offices exceptional
- Learn how to implement systems that make a difference in your team and your patients.
- Learn tips and tricks of materials, technique and technology you have in your practice now to catapult your practice.

Human Resources 101

Best Practices, Rules, Strategies and What You Need to Know

PRESENTED BY  Karen Wilson

RECOMMENDED FOR  D OM

10:30 AM - 12 PM  COURSE NUMBER 9132

ODA course  CE CREDITS 1.5

Human resources is a necessary part of most organizations; knowing the concepts, rules and strategies will save administrative time and boost your bottom line. In this course, you will learn the HR responsibility of the dental office and how to apply best practices and manage HR functions related to: recruiting, hiring, termination, discrimination, payroll, job descriptions, professional development, performance evaluations, contractual agreements, record keeping, employee retention, disciplinary actions, paid time off, sick leave, risk management, FMLA, employee handbooks, OSHA Safety Regulations, employment posters, general work ethics, and online resources.

Attendees will gain an understanding of the human resources policies, procedures and regulations necessary for their dental practice. These best practices can be applied to federal and state workplace actions that will help to protect your company.

At the conclusion of this course, attendees will be able to understand:
- Human resources responsibilities in dental practices
- How to apply standard human resources rules and strategies
- Your active role in managing people
- How to apply best practices for better employee performance
- The importance of record keeping
- Effective recruitment methods
- Streamlining onboarding strategies

This Can All Be Easier
A Dozen Projects That Will Make Your Office a Fun, Easy, and Productive Place to Work
PRESENTED BY David Ahearn, DDS
RECOMMENDED FOR D HA
2 - 5 PM COURSE NUMBER 9133
ODA course CE CREDITS 3**
As dental practices become more and more sophisticated, the work of our clinical staff has become an extremely challenging, seemingly impossible, endeavor. Dr. Ahearn shows you how to reduce clutter, decrease inventory, improve on-time performance, speed room turnaround, simplify infection control, increase office profitability, and more! Enjoy a healthy, less stressful workplace and grow your practice.

At the conclusion of this course, attendees will:
• Never run out of chair-side supplies
• Perform effectively in two- and four-hand mode
• Have predictable on time performance every day
• Create the simplest and most effective sterilization and resupply system
• Make your treatment rooms highly productive and inviting to patients

**This course appears to meet the Oregon Board of Dentistry’s requirements for CE related to practice management and patient relations.

Please be advised that there is a $25 processing fee for faxed or mailed registrations.

EARLY BIRD DEADLINE: February 23, 2018
Register by February 23 for early bird pricing and to receive your conference materials prior to ODC.

OFF-SITE LECTURE & WORKSHOP
Cone Beam CT Dissection of the Head and Neck
Clinical Application and Interpretation
PRESENTED BY Homayon Asadi, DDS
David Hatcher, DDS, MSc, MRCD(C)
RECOMMENDED FOR D H LT
9 AM - 5 PM COURSE NUMBER F1005
ODA course CE CREDITS 6
COURSE LIMIT 24 participants
ADDITIONAL FEE $125
NOTE: This course will be held offsite at Legacy Institute for Surgical Education & Innovation at 1225 NE 2nd Avenue in Portland (about 0.4 miles from the Convention Center).

Introducing an inaugural dissection course at the Oregon Dental Conference, using Cone Beam CT to preview and identify head and neck anatomy prior to and during dissection. This will include the superficial and deep structures of the face, supra hyoid region, floor of the mouth, neurovascular pathways, masticatory musculature, paranasal sinuses, and temporomandibular joint. You will see real time computer vision CBCT to guide dissection. The course combines dissection with CBCT applied to maxillofacial anatomy and pathosis.

At the conclusion of this course, attendees will:
• Observe anatomic correlations between CBCT and dissection
• Reinforce knowledge of CBCT anatomy by visualization
• Differentiate dissection skills through CBCT
• Differentiate normal anatomy and pathosis

Medical Emergencies
PRESENTED BY Normund Auzins, DDS
RECOMMENDED FOR D H A OM
1 - 5 PM COURSE NUMBER 9134
ODA course CE CREDITS 4
The goal of this course is to develop competency in the assessment, diagnosis, and management of patients who may present with potentially life threatening conditions. Given the sporadic and relatively uncommon nature of medical emergencies in the dental office, competency in the management of these situations is dependent on knowledge of medical conditions that may place a patient at higher risk of such an event. Prevention of any type of emergency is the core focus of this course. Furthermore, this course will guide each participant how to be prepared for such emergencies and current concepts in the management of possible scenarios that could occur in your practice.

At the conclusion of this course, attendees will be able to:
• Set up the necessary items for a dental practice to be prepared for various medical emergencies
• Implement a culture within the practice considering basic concepts known to help prevent emergencies
• Identification, diagnose, and manage medical emergencies with emphasis on the following topics: the unconscious patient, chest pain, drug related emergencies, the diabetic patient, seizure activity, and anaphylaxis
At the conclusion of this course, attendees will understand:

- Why good infection control practices are more important than ever
- The need for a written infection control plan and an infection control coordinator
- What should be in the written infection control plan
- The essentials of CDC Standard Precautions and aseptic techniques
- Current issues with infectious disease
- Management of an exposure incident per OSHA bloodborne pathogen standard
- The Tuberculosis Community Risk Assessment and Control Plan
- The important immunizations for dental health care workers
- The importance of proper hand hygiene
- The proper personal protective equipment and use of "The Spaulding classification of instruments
- Proper instrument reprocessing procedures
- Proper sterilizer monitoring methods and record keeping
- What to do in case of a biological (spore) test failure
- The disadvantages of cold sterilization chemicals
- The proper use of cold sterilization chemicals
- Proper surface cleaning and disinfection
- How to manage dental unit waterlines
- Special precautions for surgical procedures
- Safe injection practices
- Dental laboratory asepsis
- Implementation of the CDC checklist for infection control in the dental setting

At the conclusion of this course, attendees will understand:

- The elements needed for a comprehensive OSHA and safety program
- The OSHA standards that apply to dentistry
- The required written safety plans, policies and their implementation
- The training requirements
- What to do if an inspection occurs
- What posters are required and how to obtain them
- The materials, devices and equipment needed for compliance
- The required documents, logs and records
- First aid requirements
- What is appropriate personal protective equipment
- The principles for the safe use of nitrous oxide and oxygen
- Basic fire safety
- Which signs are required to be posted
- The new globally harmonized system for hazardous chemicals
- Proper labeling procedures
- How to properly maintain safety data sheets (SDS)
- The chemical and biological spill cleanup procedures
- The safety requirements for lasers
- The bloodborne pathogen post-exposure protocol and Hepatitis B vaccine
- Bloodborne pathogens, why they are harmful, and how to protect yourself
- The requirements for safety committees or safety meetings

This course is sponsored by Henry Schein Dental

**NOTE ON CE CREDITS:** No partial credit will be awarded.
FRIDAY, APRIL 6 COURSES BY DATE

The Acci-Dental Insurance Coordinator
PRESENTED BY Teresa Duncan, MS, FAADOM
RECOMMENDED FOR D OM
2 - 5 PM COURSE NUMBER 9140
ODA course CE CREDITS 3**
NOTE This course is also offered on Thursday afternoon.

Insurance is an important part of your office’s revenue cycle but it does not need to overwhelm your daily routine. Manage your information and your claims to minimize delays and rejections. This course is perfect for the new or uncertain coder.

At the conclusion of this course, attendees will understand:
• Introduction to basic coding, including explanation of the most common procedures encountered in a dental office
• Tips to obtain reimbursement for your practice and your patients, including writing your narratives and sending attachments
• Coding trends including dental diagnosis codes

THIS COURSE IS SPONSORED, IN PART, BY CareCredit
**This course appears to meet the Oregon Board of Dentistry’s requirements for CE related to practice management and patient relations.

CPR for the Health Care Provider
PRESENTED BY EMT Associates
RECOMMENDED FOR D H A OM LT
9 AM - 12:30 PM COURSE NUMBER F1006
ODA course CE CREDITS 3.5
ODA course CE CREDITS 3.5
THIS COURSE REPEATS IN THE AFTERNOON:
1:30 - 5 PM COURSE NUMBER F1007
ODA course CE CREDITS 3.5
ADDITIONAL FEE $25

NOTE This course is also offered on Thursday and Saturday.

This is an American Heart Association class emphasizing the CAs of resuscitation, including rescue breathing, use of bag-valve mask, AED, CPR, and foreign body airway removal for all age groups. The workshop will include written and skills evaluations. Re-certification is for two years.

Course attendees will receive a copy of the American Heart Association’s required textbook, BLS for Healthcare Providers Student Manual. Please note, this text will only be distributed onsite to course attendees. It will not be available to registered individuals who are not present.

ODEA COURSE
Treatment and Presentation Skills for the Dental Team
The Team, The Whole Team, and Nothing But the Team
PRESENTED BY Debra Englehardt-Nash
RECOMMENDED FOR D H A OM
9 AM - 5 PM COURSE NUMBER 9141
ODA course CE CREDITS 6

The dental team has great influence in the way the patients perceive the quality of care being provided. The way they treat patients is a defining moment in how patients feel about the doctor, their treatment and the way the practice operates. They validate (or invalidate) the patients’ decision they have chosen the right office – and there is approximately 9 to 15 seconds to accomplish this.

In spite of a doctor’s exceptional clinical skills, the team can unwittingly weaken the strengths of the office. This program will provide specific steps in how to introduce patients to the practice and engage them in treatment. This workshop will explore how we can genuinely improve our communication effectiveness at the treatment chair to increase treatment acceptance, patient satisfaction and practice growth.

At the conclusion of this course, attendees will understand:
• Learn how to conduct a patient interview
• Acquire the skills to present treatment options
• Learn how to overcome patient objections
• How to ask the important questions – and find out what the important questions are!
• Discover how to enhance team roles – at all levels

INTERNATIONAL VOLUNTEER DENTAL PROJECTS
What’s It All About, Anyway?
PRESENTED BY Ronald Fritz, DDS, MPH
RECOMMENDED FOR D H A OM LT
9 AM - 12 PM COURSE NUMBER 9143
ODA course CE CREDITS 3*

This course is designed for dentists, dental hygienists, and other interested parties who want to learn more about the nuts and bolts of volunteering around the world or around the block. It will also be useful for those with some volunteering experience looking for new ideas or validation of what they are doing. Topics include the nature of volunteer activities, cross-cultural issues, comparison of service and teaching projects, how to get started either at home or abroad, the nuts and bolts of volunteering overseas and at home, and where to find these volunteer opportunities. There will be ample time for interaction with the presenters and other experienced members of the audience.

At the conclusion of this course, attendees will understand:
• Focus on the importance of working within the context of the local community
• Compare and contrast the nature of teaching and service projects with the advantages and disadvantages of each type
• Outline the steps necessary to get started including needs assessment, goal setting, and team assembly
• Describe the nuts and bolts of volunteering including what to do and resources to support the project
• Find volunteer projects and other sources of information

**This course DOES NOT appear to meet the Oregon Board of Dentistry’s CE requirements.

Local Anesthesia Update
PRESENTED BY Solon Kao, DDS, FICD
RECOMMENDED FOR D H A
9 AM - 12 PM COURSE NUMBER 9144
ODA course CE CREDITS 3

The last time we learned about local anesthesia was very early in our dental education. It is important for us to revisit this basic but extremely important topic in dentistry which – without it – it would be extremely hard to perform well in our profession. We will discuss the basics of local anesthesia including applied anatomy associated with this medicine which we cannot live without.

At the conclusion of this course, attendees will be able to:
• Review different types of local anesthesia agents, and instrumentation used, including important anatomical landmarks for local anesthesia injection
• Discuss local anesthesia reversal agent
• Understand the latest information and literatures on Articaine

The latest information and literatures on Articaine

"RECOMMENDED FOR" KEY:  D Dentists  H Hygienists  A Assistants  OM Office Managers  LT Laboratory Technicians

"RECOMMENDED FOR" KEY:

At the conclusion of this course, attendees will understand:
- proper incision and flap design.
- illustrate how suturing wound or laceration site requires lead to serious negative results. This presentation will allow for successful management of everything from very advanced cases that might otherwise have been treated only with extraction, to infected cases you might traditionally treat with non-surgical methods. In doing so, CONTINUES IN NEXT COLUMN

Oregon State Association of Endodontists (OSAE)
Course & Luncheon Schedule

Friday, April 6

7:30 – 8:30 AM  ODC General Session
Tim Gard

9 AM – 12 PM  Biologically Appropriate Management of Multifaceted Endodontic Diagnosis and Referral Strategies
Eric Rivera, DDS, MS

10 AM – 6 PM  Solutions Marketplace Open

12 – 1:30 PM  OSAE Luncheon

1 – 4 PM  Biologically Appropriate Management of Multifaceted Endodontic Diagnosis and Referral Strategies, cont.
Eric Rivera, DDS, MS

4 – 6 PM  New Dentist Reception

All OSAE members are welcome to attend the OSAE luncheon at the Oregon Convention Center. For more information and to RSVP, please contact Dr. Ken Christiansen at 503.363.6500 or kc.endodoc@comcast.net.

OSAE members do not need to be registered for the ODC in order to attend the luncheon, but do need to be registered to attend the OSAE-sponsored courses.

Biologically Appropriate Management of Multifaceted Endodontic Diagnosis and Referral Strategies
Presented by: Eric Rivera, DDS, MS
Recommended For: DHA

9 AM - 5 PM  Course Number: 9156  OSAE Course  CE Credits: 6

Many general practitioners are hesitant to treat endodontically involved teeth, and often refer procedures that, with extra diagnostic and treatment skill, could be treated within the general practice setting. Dr. Rivera will guide us through diagnosis, treatment, and referral strategies for these difficult cases – including longitudinal tooth fracture detection, treatment, and prognosis – to determine when to treat versus refer. Endodontics is the diagnosis, prevention and/or elimination of apical periodontitis. The importance of diagnosis and the role of microbiology and asepsis will be used to describe endodontic treatment that is biologically appropriate versus mechanically possible. Elimination of bacteria in the canal space by instrumentation and/or chemical disinfection and/or intracanal medication will be discussed. A rationale for placing an intraorifice barrier to protect root canal fillings will be presented.

At the conclusion of this course, attendees will be able to:
- Define endodontics
- Review a method to determine case difficulty when deciding whether to treat or refer a case requiring endodontic treatment
- Review the importance of determining an appropriate diagnosis in determining an endodontic treatment plan
- Characterize the etiologic factors responsible for inflammation of the pulp and periapex
- Define and differentiate between subjective and objective diagnostic findings
- Interpret the significance of symptoms, findings, and clinical tests used in the identification of diseases of the pulp and periapex
- Describe indications of test cavity, selective anesthesia, transillumination tests, and tests for incomplete and complete longitudinal fractures
- Reconsider a biological approach to eliminate bacteria and disinfect the root canal space
- Reconsider the terminus of root canal fillings from the apex to external tooth surface (not just orifice)
- Reconsider the use of intraorifice barriers to protect root canal fillings

Note: There are two OSAE-sponsored courses on Thursday (presented by Dr. Goodis and Dr. Replogle), as well as one on Saturday (presented by Drs. Koch and Nasseh).

Friday Courses | 19
FRIDAY, APRIL 6

COURSES BY DATE

Diagnosis and Treatment of Recurrent Oral Ulcers
PRESENTED BY Denis Lynch, DDS, PhD
RECOMMENDED FOR D H A
9 AM - 12 PM COURSE NUMBER 9148
ODA course CE CREDITS 3

Recurrent oral ulcerations frequently pose diagnostic and therapeutic problems for the practicing dentist and dental hygienist. Because of overlapping clinical signs and symptoms, many of these disorders may be confused with each other and, as a result, treated inappropriately. This presentation is designed to provide dentists, dental hygienists, and assistants with the major clinical signs and symptoms of suspected diseases’ diagnostic criteria, and tests needed to achieve an accurate diagnosis, and to recommend therapeutic modalities used in patient care. Emphasis will be placed on those disorders that the practicing dentist and dental hygienist can expect to encounter in an average patient population.

At the conclusion of this course the attendees will:
- Know and be able to recognize the clinical signs and symptoms of common and significant recurrent oral ulcers
- Know the appropriate procedures to confirm the diagnosis
- Know the appropriate therapeutic modalities to treat the infections
- Know when a referral for treatment is appropriate and indicated.

Patient-Centered Dental Benefits and Risk Assessment
PRESENTED BY Shannon Mills, DDS
RECOMMENDED FOR D H A OM LT
9 AM - 12 PM COURSE NUMBER 9150
ODA course CE CREDITS 3

This course will discuss the historical and scientific basis for oral health risk assessment, including currently available analog and digital resources. It will describe how scientifically validated digital oral health risk and disease severity measurement creates new ways to engage patients and caregivers to improve understanding, case acceptance and compliance. The speaker will describe how objective and repeatable digital health assessment technologies are transforming the relationships between third-party payers, patients, and providers to create more patient-centric and evidence-based models of care consistent with the “triple aim” of healthcare. The speaker will provide case studies showing how practices can use risk assessment technology to make their practices both more efficient and more effective in helping patients attain their best possible oral and overall health.

At the conclusion of this course, attendees will:
- Understand the conceptual basis for oral health risk assessment and the relationship to evidence-based dentistry and quality
- Understand the difference between diagnosis, disease severity measurement and risk assessment and know how they influence prevention focused treatment planning
- Learn how “knowing your numbers” can improve patient case acceptance, compliance with recommended care and overall satisfaction
- Be able to describe the role that objective assessment of oral health risk plays in achieving the “triple aim” of healthcare quality for individuals and populations
- Be able to take advantage of risk-based oral wellness programs offered by an increasing number of third-party payers using oral health risk and severity measures to automate preventive care benefit determination based on the individual needs of patients rather than traditional “one-size-fits all” plan designs
- Learn how dentists are using risk assessment technology to improve clinical efficiency and optimize the revenue-generating potential of their hygiene departments.

Management and Prevention of Gingival Recession
The Interactive Seminar
PRESENTED BY George K. Merijohn, DDS
RECOMMENDED FOR D H A OM LT
9 AM - 12 PM COURSE NUMBER 9149
ODA course CE CREDITS 3

Is gingival recession exposing your restorative margins and root surfaces in the esthetic zone? Are you seeing it with tooth movement? Discover how to avoid recession in the first place and, once it’s treated, how to keep it from coming back. Learn the five key susceptibility factors and test your knowledge using practical chairside tools that increase patient compliance and prevent gum disease.

At the conclusion of this course, attendees will:
- The key factors associated with increased susceptibility to gingival recession
- Triage, evaluate, treatment plan, and communicate with patients regarding gingival recession
- When and how to monitor recession and when patient is a candidate for surgical evaluation or referral

KIWImethod® Hands-On Workshop
Minimally Invasive Gingival Grafting
PRESENTED BY George K. Merijohn, DDS
RECOMMENDED FOR D
2 - 5 PM COURSE NUMBER F1008
ODA course CE CREDITS 3

COURSE LIMIT 24 participants
ADDITIONAL FEE $100

NOTE: Attendees are required to provide their own magnification loupes with battery-powered light source or safety glasses/goggles.

ALLERGEN ALERT: Fresh kiwi fruit is used in this workshop.

Gingival recession presents challenging treatment considerations for the practicing dentist. Fear of postsurgical pain, bleeding and sometimes unpredictable results associated with conventional autogenous grafting surgery can cause dentists to hesitate in treatment. KIWImethod® workshop is the engine for change you’ve been looking for to learn how to treat the root coverage and non-root coverage. It’s a proven approach used to train postdoctoral periodontal residents in precision grafting techniques. Autogenous gingival grafting is the gold standard and KIWImethod® minimally invasive recipient site preparation for root coverage and non-palatal tissue harvesting lessen post-op bleeding/discomfort and improves outcomes.

At the conclusion of this course, attendees will:
- Understand practical recipient site preparation for root coverage and non-root coverage outcomes
- Learn special techniques for minimally invasive graft harvest from the tuberosity and pre-maxilla palatal zone
- Understand predictable suturing techniques and time-tested post-op protocols

This course is sponsored, in part, by CARIFREE.

Get the ODC App!
ODAA COURSE

Lumps, Bumps, Patches, and Bone Lesions
A Review of Common Oral and Facial Lesions and Oral Cancer Update

PRESENTED BY Daniel Petrisor, DMD, MD, FACS
RECOMMENDED FOR D HA OM LT
9 AM - 12 PM COURSE NUMBER 9151 ODAA course CE CREDITS 3

This course will present a potpourri of pathologic cases. Emphasis will be placed on lesions and conditions commonly seen in dental practice, as well as premalignant and malignant lesions. This will include a discussion of the human papilloma virus (HPV) and the related epidemic of HPV-driven cancers.

A special emphasis will be placed on common patient-related concerns, such as their routes of transmission and malignant potential. In addition, salivary gland conditions and malignant potential. In addition, salivary gland conditions and malignant lesions. This will include a discussion of the human papilloma virus (HPV) and the related epidemic of HPV-driven cancers.

At the conclusion of this course, attendees will be able to:
• Recognize and formulate a differential diagnosis, understand the etiology, and describe the management of various oral lesions and diseases
• Recognize the association of HPV with numerous oral soft tissue lesions and understand the implications of HPV-driven cancers and lesions
• Understand the significance of various risk factors for squamous cell carcinoma and perform an effective oral cancer screening examination
• Identify soft tissue abnormalities suspicious for squamous cell carcinoma or epithelial dysplasia
• Understand the current treatment modalities for patients with head and neck cancer
• Recognize the reconstructive options available for patients with head and neck cancer
• Understand the pathogenesis, signs and symptoms of medication related osteonecrosis of the jaw
• Understand the implications of anti-resorptive drug therapies as it relates to extraction of teeth and placement of dental implants

ODAA COURSE

Nerve Injuries in Dentistry Prevention and Management

PRESENTED BY Daniel Petrisor, DMD, MD, FACS
RECOMMENDED FOR D HA OM LT
2 - 5 PM COURSE NUMBER 9152 ODAA course CE CREDITS 3

This course provides an introduction to orofacial nerve injuries. The course will first review the relevant anatomy, etiology, and pathophysiology of nerve injury. The course will then discuss the clinically relevant nerve injury prevention strategies, patient assessment, documentation, monitoring and guidelines for referral. Finally, treatment strategies including the role of medications in acute nerve injury, non-surgical and surgical treatment modalities including the use of conduits and grafting alternatives will be discussed.

At the conclusion of this course, attendees will:
• Gain an understanding of causes, assessment, testing, conservative management and indications for referral in the patient with a trigeminal nerve injury in the dental office
• Develop a strategy for handling difficult patient interactions, learn good documentation techniques and understand the referral process
• Learn practical ways to help prevent nerve injuries in the dental office
• Understand the anatomy and mechanisms of nerve injury
• Discuss and demonstrate with detailed surgical photography the techniques used in repairing various injuries to the trigeminal nerve

ODA EXPERT EXPRESS LECTURE

Essentials of Orofacial Pain and Temporomandibular Disorders

PRESENTED BY James Rapson, DDS, MS Susan Rustvold, DMD, MS, EdD
RECOMMENDED FOR D HA
2 - 3:30 PM COURSE NUMBER 9153 ODAA course CE CREDITS 1.5

There are a number of physical phenomena that present with symptoms that can resemble or overlap with temporomandibular disorders (TMD). Clinical features of temporomandibular disorders and recommendations for patient education and self-care will be discussed in an interactive format. The presentation will compare with TMD other disorders such as cluster headache, Giant Cell Arteritis/Temporal Arteritis, migraine, bruxism associated with obstructive sleep apnea, et al.

FRIDAY, APRIL 6

The Mighty Thyroid
Linking Thyroid Function to Oral and Systemic Health

PRESENTED BY Betsy Reynolds, RDH, MS
RECOMMENDED FOR D HA
9 AM - 12 PM COURSE NUMBER 9154 ODAA course CE CREDITS 3

With an estimated 200 million people suffering some form of thyroid disease in the world (many of whom are undiagnosed), oral healthcare providers are dealing with the ramifications of thyroid malfunction in their patients on a routine basis. Research endeavors focusing on potential causes for the dramatic upsurge in rates of thyroid disorders are providing insight relevant to treatment options, dietary considerations and oral healthcare recommendations offered in the dental and dental hygiene settings. Come prepared to learn about this fascinating endocrine gland in a relaxed atmosphere designed to promote audience participation while enhancing the learning experience.

At the conclusion of this course, attendees will be able to:
• Understand the role the thyroid gland plays in health and disease
• Formulate dietary recommendations for patients receiving treatment for thyroid disease
• Modify in-office procedures to accommodate thyroid medication interactions
• Recognize oral and systemic signs and symptoms of thyroid malfunction
• Devise appropriate home care recommendations for patients with thyroid dysfunction

Up in Smoke
Current Trends in Smoking Habits Affecting Oral and Systemic Health

PRESENTED BY Betsy Reynolds, RDH, MS
RECOMMENDED FOR D HA
2 - 5 PM COURSE NUMBER 9155 ODAA course CE CREDITS 3

Americans are using a variety of smoke-producing tobacco and non-tobacco containing devices that are impacting modern day society in profound ways. The popularity of hookah bars, ‘little cigars,’ and smokeless tobacco products (especially among young people) has renewed concern among oral healthcare providers that use of any tobacco-containing product negatively impacts both oral and systemic health. The explosion in the use of electronic cigarettes (‘e-cigs’) has many concerned as well. Regional statistics will be included to foster understanding of local trends in smoking habits. Course participants will learn about the latest research regarding these smoking trends in a relaxed forum designed for interactive learning.

At the conclusion of this course, attendees will be able to:
• Elucidate the systemic ramifications of tobacco use
• Describe current trends in cigarette use
• Recognize the ramifications of regular hookah use
• Differentiate between various smokeless tobacco products
• Discuss ‘little cigar’ (cigarillo) use among adolescents
• Examine the effects of nicotine exposure
• Design appropriate tobacco and smoking cessation therapies for implementation into the dental setting

CHANGE THE GAME
Reduce Stress to Boost Morale and Teamwork!

Presented by Tim Gard, CSP, CPAE

Don’t miss the General Session!
Friday, April 6, 7:30 – 8:30 AM

*RECOMMENDED FOR KEY: D Dentists H Hygienists A Assistants OM Office Managers LT Laboratory Technicians
NOTE ON CE CREDITS: No partial credit will be awarded.
Seven Secrets to Living Well
PRESENTED BY  Pam Smith, RDN
RECOMMENDED FOR  D H A OM LT
9 AM - 12 PM  COURSE NUMBER  9157
ODA course  CE CREDITS  3**
Millions of Americans are controlled by fatigue and illness, unaware of how much their personal power drain is negatively affecting their quality of life and oral health. Don’t let a lack of wellness become your “new normal.”
Discover the most current research and practical guidelines for whole-body health—the seven secrets to stabilize blood chemistries, shed the stress response, defuse inflammation, and reclaim energy for life.

At the conclusion of this course, attendees will understand:
• The chemistry behind the body’s hormonal and immunity systems and the role of stress hormones and neurochemical imbalance on weight, energy levels and inflammation.
• Therapeutic role of optimal nutrition, exercise and sleep on the inflammatory response and specific anti-aging lifestyle strategies for lifelong wellness.
• Learn about the healthiest diets in the world with fresh, close-to-the-source food systems, MUFAs and omega threes, and the wellness impact on the body through the life cycle.
**This course appears to meet the Oregon Board of Dentistry’s requirements for CE related to practice management and patient relations.

Building a Healthier You
An Insider’s Guide to Living Better Longer
PRESENTED BY  Pam Smith, RDN
RECOMMENDED FOR  D H A OM LT
2 - 5 PM  COURSE NUMBER  9158
ODA course  CE CREDITS  3**
Know your numbers; know your risk — and the reversal strategies for optimal health and wellness. Smith targets the top five diseases afflicting Americans and the bloodwork profiles that reflect them and the impact on the biological mechanisms of aging and inflammation. Learn to employ the natural prescription: real food nutrition, exercise, and the impact of natural treatments such as nutraceuticals, supplements, spices and herbs.
At the conclusion of this course, attendees will be able to:
• Identify the top five diseases affecting Americans: the causes, risk factors, and predictive biometric and lab values.
• Understand the biological mechanisms of the aging process, the body and hormonal systems, and the way they interact to keep the body well and at optimal functioning.
• Learn to employ the specific therapeutic lifestyle strategies to compensate for ill effects of a sedentary lifestyle, poor diet and chronic stress, preventing disease and promoting lifelong wellness.
**This course appears to meet the Oregon Board of Dentistry’s requirements for CE related to practice management and patient relations.

Silver Diamine Fluoride: Black Teeth
The When, What, Why, and How of SDF
PRESENTED BY  Michelle Stafford, DDS
RECOMMENDED FOR  D H A
10:30 AM - 12 PM  COURSE NUMBER  9159
ODA course  CE CREDITS  1.5
This course will review the science behind silver diamine fluoride including case studies and evidence based dentistry indicating the efficacy of its use to arrest decay, how long it has been in use and its origin. This course will review caries risk assessment and any contraindications to SDF use. It will demonstrate proper handling of SDF and the stain potential. In addition, the course will include photos and videos of actual patients and how it can be used in the dental office to arrest decay as well as the SMART technique, which utilizes glass ionomer in addition to SDF.
At the conclusion of this course, attendees will understand:
• Feel confident in their knowledge of silver diamine fluoride.
• Understand how to provide patients with risks and benefits of SDF as an alternative to the traditional surgical model of treating caries.
• Understand how to take their new knowledge and incorporate the proper techniques in their own practices.

The Chamber of Self-Medication Secrets
Self-Medication, Dental Considerations, and Patient Care Planning
PRESENTED BY  Thomas Viola, RPh, CCP
RECOMMENDED FOR  D H A OM LT
9 AM - 12 PM  COURSE NUMBER  9160
ODA course  CE CREDITS  3
Our patients – armed with limited, and often biased, information and faced with rising prescription drug costs, continue to self-medicate with a variety of prescription and non-prescription drug products. Many patients add or substitute both prescription and non-prescription drug products in their medication regimen, unaware of potentially serious adverse outcomes – and often without mention during a review of medical history.
This program will provide participants with an overview of the dental considerations of the most popular prescription and non-prescription drugs and supplements that patients use to self-medicate. Using case scenarios, special emphasis will be given to techniques useful in successfully identifying self-medication and obtaining a complete patient medication history.
At the conclusion of this course, attendees will understand:
• The most commonly used prescription and non-prescription drugs used to self-medicate.
• The most commonly used herbal products and nutritional supplements used to self-medicate.
• Describe the licit and illicit uses of these products and their potential clinical dental considerations.
• Techniques useful in identifying self-medication and obtaining a complete and accurate medication history.
• Strategies necessary for successfully managing self-medicating patients.

Top of the Heap
Frequently Prescribed Medications and Clinical Dental Considerations
PRESENTED BY  Thomas Viola, RPh, CCP
RECOMMENDED FOR  D H A OM LT
2 - 5 PM  COURSE NUMBER  9161
ODA course  CE CREDITS  3
The challenge faced by all clinicians today is to provide safe and effective dental treatment to our medically complex patients. However, dental professionals find themselves practicing in a marketplace awash in direct to consumer advertising of prescription drugs and in the midst of an explosion of new drug entities over the last several years. Thus, many dental professionals may find it challenging to stay up to date with the latest prescribing trends in disease state management.
This program will provide an overview of those frequently prescribed brand name medications whose actions, side effects, contraindications and potential drug interactions may have the greatest impact on dental therapy.
At the conclusion of this course, attendees will understand:
• Identify the most frequently prescribed FDA-approved brand name medications for the treatment of systemic illnesses.
• Discuss the basic mechanisms of action, potential adverse reactions, drug interactions and contraindications of these medications.
• Explain the clinical dental considerations of these medications and their potential impact on dental therapy.
• Describe patient management strategies essential for successful treatment planning and proper care of our medically complex dental patients.

Cosmetic Pearls for the General Practitioner
PRESENTED BY  Marty Zase, DMD, MAGD, AAACD, FACD
RECOMMENDED FOR  D H A OM LT
9 AM - 5 PM  COURSE NUMBER  9162
ODA course  CE CREDITS  6
This course was designed by Dr. Zase to help dentists who want to include more cosmetic dentistry procedures in their practices. This lecture gives many tips on how to do cosmetic dentistry better and more efficiently.
Subjects include: adhesive and microdentistry techniques to eliminate all sensitivity in posterior composites, zero sensitivity bleaching, invisible restorations, porcelain veneers, bonding, and presenting cosmetic dentistry.
At the conclusion of this course, attendees will be able to:
• Utilize the mini-prep: a minimally invasive technique for restoring incipient carious lesions.
• Understand how to select and use the best bonding agents to eliminate all post-op sensitivity with posterior composites.
• Provide zero sensitivity bleaching both in-office and at home.
• Understand when and how to utilize ovate pontics.
• Incorporate better products for excellent results and better efficiency.
• Be more confident in tackling and presenting cosmetic dental treatment involving veneers, crowns, bleaching, ovate pontics, and smile makeovers.

Early bird deadline: February 23  |  Register:  www.OregonDentalConference.org
Homayon Asadi, DDS
Dr. Asadi is the interim co-chair of the preventive and restorative dentistry department, and an associate professor and a course director of anatomy and histology for the department of biomedical sciences at University of the Pacific, Arthur A. Dugoni School of Dentistry.

He has been actively involved in academics for over 25 years, both lecturing and dissection on many subjects. Dr. Asadi lectures frequently, is a member of several honor societies including OKU and American as well as International College of Dentists. He has been recognized and honored for distinguished merit in teaching and he also maintains a private practice in cities of San Jose and Hollister, California.

David Hatcher, DDS, MSc, MRCD(C)
Dr. Hatcher received his DDS degree from the University of Washington and was granted a specialty degree in oral and maxillofacial radiology and an MSc from the University of Toronto.

Presently Dr. Hatcher is in private practice in Sacramento, California, and has faculty appointments as clinical professor at UCLA, UCSF, UCD, Roseman University, and the University of Pacific, Arthur A. Dugoni School of Dentistry.

Cone Beam CT Dissection of the Head and Neck

PRESENTED BY  Homayon Asadi, DDS  David Hatcher, DDS, MSc, MRCD(C)

Don’t miss our inaugural dissection course at the Oregon Dental Conference, using Cone Beam CT to preview and identify head and neck anatomy prior to and during dissection. This will include the superficial and deep structures of the face, supra hyoid region, floor of the mouth, neurovascular pathways, masticatory musculature, paranasal sinuses, and temporomandibular joint.

You will see real time computer vision CBCT to guide dissection. The course combines dissection with CBCT applied to maxillofacial anatomy and pathosis.

Reserve your space today – course is limited to 24 participants.

Note, there is an additional fee of $625 for this workshop. Course will be presented off-site at the Legacy Institute for Surgical Education & Innovation at 1225 NE 2nd Ave in Portland.

Please see page 16 for full course description and details.

Casino Night

After a day of learning, gather your team for an evening of fun! This event has something for everybody – dinner, drinks, music, dancing, casino games, and fantastic prizes.

Join in the fun by adding a ticket to your conference registration. All are welcome and encouraged to attend!

This event is graciously sponsored, in part, by:

moda
Delta Dental of Oregon

Friday, April 6
6 – 10 PM
DoubleTree by Hilton Hotel Portland

$35 per person
REGISTRATION CODE F1000
This event is for ALL members of the dental team.
SATURDAY, APRIL 7

RESTORATIONS FOR OUR PEDIATRIC PATIENTS

PRESENTED BY Carla Cohn, DMD
RECOMMENDED FOR D HA
8 - 11 AM COURSE NUMBER 9165
ODA course CE CREDITS 3**

Our pediatric restorative patients are unique. We must treat our children while taking direction from their parents. We must treat a tooth while managing behavior. Our choices of materials and techniques are vast and varied. This course will cover several different restorative approaches to care for our kids. Focus will be placed upon indications of each option. We will learn to use materials that are suitable to different behavior management situations and explore the bioactivity of restorative alternatives.

At the conclusion of this course, attendees will:

- Treat pediatric restorative needs of your patients
- Understand the different restorative materials, their indications and techniques
- Recognize which materials offer a favorable bioactive effect

This course is sponsored, in part, by

ODA EXPERT EXPRESS LECTURE

OBSTRUCTIVE SLEEP APNEA

The Evolving Surgical Algorithm for Management of Refractory Patients

PRESENTED BY Allen Cheng, DDS, MD
RECOMMENDED FOR D HA
9:30 - 11 AM COURSE NUMBER 9164
ODA course CE CREDITS 1.5

Obstructive sleep apnea (OSA) is a highly prevalent and underdiagnosed condition that affects systemic health. Treatment of this disease has yet to adopt a coordinated multidisciplinary team approach, despite the benefits that all providers can bring to the patient. This lecture will review the benefits and limitations of different surgical techniques for patients with advanced OSA, as well as discussing the promise of a newer, novel technique.

At the conclusion of this course, attendees will be able to:

- Stratify patients who likely have disease that goes beyond sleep appliances and may need surgical consultation
- Discuss the potential systemic health benefits to the patient of treatment of OSA
- Identify some experimental techniques that show promise in treating OSA

ODHA COURSE

CPR for the Health Care Provider

An Evidence-Based Approach

PRESENTED BY Edie Gibson, RDH, MS
RECOMMENDED FOR D H A
8 - 11 AM COURSE NUMBER 9168
ODA course CE CREDITS 3

This course is also offered on Thursday and Friday.

ODA COURSE HANDOUTS

Access course handouts online at www.oregondentalconference.org, or through the ODC Mobile App, starting on March 22.

SPEAKER BIOS

Learn more about the presenter of a course, starting on page 28.
Patient Care in the Digital Dental Office

PRESENTED BY: David Guichet, DDS
RECOMMENDED FOR: D H A OM LT

8 AM - 4 PM  COURSE NUMBER 9169
ODA course  CE CREDITS 3

Illicit drug use and abuse, especially opioids, has skyrocketed and now is an epidemic. Youth of today have unlimited access to many mind-altering, highly addictive drugs and have embraced this counter-culture as part of their everyday lives. As health care professionals, we are ideal first responders on the front line of this war. The devastating impact of this trend is debilitating and destructive, from oral health to whole body wellness. This life-changing, brutally honest program will give you tools and information to effectively recognize the signs and symptoms of the drug abusing patient. It will empower you to make a significant difference in their lives! Ms. Gibson will share her own life stories about working and living with addicts.

At the conclusion of this course, attendees will:
- Identify the top five drugs of abuse
- Recognize the signs and symptoms of substance abuse and addiction
- Appreciate how illicit drugs adversely affect the brain and its vital neural pathways
- Develop communication strategies to improve patient engagement

Infection Control in Dentistry

PRESENTED BY: Ginny Jorgensen, CDA, EFDA, EFODA, AAS
RECOMMENDED FOR: D H A OM LT

1 - 4 PM  COURSE NUMBER 9170
ODA course  CE CREDITS 6

Traditional methods of diagnosing and treating patients have been replaced by digital processes and are forever changed. Multiple technologies have contributed to this trend. In addition to CBCT imaging, intraoral and laboratory scanning, newer open software platforms for surgical guide and restoration design allow for local CAD/CAM production. Cost-effective milling and printing capabilities have also accelerated this trend. Simultaneously, restorative materials have been introduced that have improved strength and aesthetic qualities. Integration of these capabilities create opportunities for enhanced restorative performance, decreased costs, and improved practice efficiency.

The present will focus on elements of the digital workflow including, digital treatment planning using merged datasets, linked digital workflows, guided implant surgery. Also, CAD/CAM abutment and restorative design will be presented in the context of new possibilities for efficient and predictable esthetic restorative outcomes.

At the conclusion of this course, attendees will be able to:
- Become familiar with digital treatment protocols in contrast to traditional workflows
- Be aware of the uses and current limitations of digital restorative design and CAD/CAM production
- Understand the trends in aesthetic implant restorative material selection and design options
- Become familiar with digital technologies that enhance treatment outcomes and understand the difference of open and closed systems and “best in breed”

Coordinated Management of Office Anesthetic Urgencies

A Program for the Doctor and Staff

PRESENTED BY: Stuart Lieblich, DMD
RECOMMENDED FOR: D A

8 AM - 4 PM  COURSE NUMBER 9174
ODA course  CE CREDITS 6

The provision of ambulatory anesthesia is an important component of many dental practices. A contemporary review of anesthesia including a discussion of patient evaluation, medications, and determining who can be treated in an office setting will be discussed. The recognition of changes in patient status by appropriate monitoring and a coordinated team approach to managing these emergencies will be presented. Actual cases from closed claim reviews and scenarios will be reviewed to illustrate various issues throughout the day. Included in the discussions will be some recommendations on local anesthetic use and integrating oral sedation into a practice.

At the conclusion of this course, attendees will:
- Understand basic medical aspects of common systemic diseases, including cardiovascular disease, diabetes, neurologic, and immunologic diseases and how they impact on our anesthesia options
- Review common and some uncommon medical and anesthetic emergencies that may occur in the office
- Provide oral sedation techniques
- Review management protocols of common medical emergencies that may occur in the office via actual case-based scenarios
- Appropriate monitoring for dental anesthesia cases and interpretation of monitors

OSOREGAN SOCIETY OF ORAL AND MAXILLOFACIAL SURGEONS (OSOMS)
Course & Luncheon Schedule

SUNDAY, APRIL 8

SATURDAY, APRIL 7

8 – 11 AM  Coordinated Management of Office Anesthetic Urgencies
Stuart Lieblich, DMD

9:30 AM – 1 PM  Solutions Marketplace Open

11 AM – 1 PM  OSOMS Luncheon

1 – 4 PM  Coordinated Management of Office Anesthetic Urgencies, cont.
Stuart Lieblich, DMD

All OSOMS members are welcome to attend the OSOMS business meeting and luncheon at the Oregon Convention Center. For more information and to RSVP, please contact OSOMS at 503.584.0322 or oregonom@gmail.com. OSOMS members do not need to be registered for the ODC in order to attend the luncheon, but do need to be registered to attend the OSOMS-sponsored course.

8 - 11 AM  
COURSE NUMBER 9172  
ODA course  
CE CREDITS 3

At last, endodontic evolution meets endodontic revolution! After two decades of research and experimentation with NiTi rotary instruments, an expandable rotary instrument has been created. New adaptive 3D files have produced a revolution in simplicity, efficiency, and safety for you and your patients. These unique instruments expand at body temperature effectively debriding and disinfecting oval and irregular shaped canals without compromising the structural integrity of the treated tooth. This body temperature transformation allows faster and safer instrumentation using less files than conventional techniques. True 3D instrumentation has arrived.

At the conclusion of this course, attendees will understand:
- The basic foundations of endodontic success
- The concept of anatomic shaping
- To triage basic and advanced cases and how to apply the correct instrumentation for each case
- Two different instrumentation techniques for managing different canal anatomies (conventional and 3D)
- The various applications of ultrasonics
- How to use integrated apex locator-handpiece technology
- To place posts using a matching post and core system

**ODA COURSE**

**Delivering W.O.W. Service**

**PRESENTED BY** Judy Kay Mausolf  
**RECOMMENDED FOR** D H A OM LT  
8 - 11 AM  
COURSE NUMBER 9176  
ODA course  
CE CREDITS 3**

Research shows that practices that build their office environment around serving the patient own and dominate the market. Customer service is often confusing, complex and vague! "I'm satisfied" means nothing in today's world. Set yourself apart from your colleagues — differentiate why you and your office are not the office down the street! Learn principles for strengthening communication skills, practice brand, and service standards. Illuminate the patient decision making processes to create lasting impressions and exceptional experiences. Inspire the entire team to deliver W.O.W. service with more passion and focus!

At the conclusion of this course, attendees will:
- Understand W.O.W. patient philosophy
- Illuminate a W.O.W. decision making process
- Learn techniques to make W.O.W. impressions
- Recognize essentials of W.O.W. branding
- Identify how to spot opportunities that create W.O.W.
- Understand touch points
- Understand W.O.W. service standards concepts

**ODA COURSE**

**Communication Solutions**

**Attitudes, Breakdowns, and Conflict Resolution**

**PRESENTED BY** Judy Kay Mausolf  
**RECOMMENDED FOR** D H A OM LT  
1 - 4 PM  
COURSE NUMBER 9177  
ODA course  
CE CREDITS 3**

Discover how to elevate your communication to a level that inspires open communication, prevents breakdowns, resolves conflict and builds trust and respect resulting in high performing team and patient relationships! Learn the skills to communicate positively and effectively with different and even difficult personalities. Discover formats to hold positive, effective and efficient huddles and team meetings. Transform attitudes from toxic to tremendous and create a positive environment where everyone looks forward to coming to the office. Ms. Mausolf, communications expert, will share how you can elevate the level of communication in your life!

At the conclusion of this course, attendees will:
- Understand the importance of a correct diagnosis in order to provide rational treatment for gingival disease
- Describe atypical gingival abnormalities and pathologies
- Develop a clinical differential diagnosis of gingival lesions
- Recognize “gingival lesions of concern” that may represent malignant or premalignant disease

**ODA COURSE**

**Beyond Straight Teeth**

**Maximizing Oral Health for the Orthodontic Patient**

**PRESENTED BY** Kristy Menage Bernie, RDH, MS, RYT

**RECOMMENDED FOR** D H A

1 - 4 PM  
COURSE NUMBER 9179  
ODA course  
CE CREDITS 3

As tooth movement sciences have evolved, so have the protocols, technologies and chemotherapeutics for optimal hard and soft tissue health. This seminar will overview the latest in protocols, such as caries management by risk assessment (CAMBRiA), as well as new technologies and products specifically designed for the orthodontic patient and their unique oral health needs. Clinically applied preventive strategies and daily care plans will be reviewed with emphasis on maximizing patient compliance and success. This session will also include methods to enhance collaborative practice with the referral community.

At the conclusion of this course, attendees will:
- Provide rationale for implementing protocols to enhance health before, during, and after orthodontic therapy
- Evaluate current technologies and products designed for the orthodontic patient and develop plan of action to incorporate methods to enhance and advance optimal oral health
- Establish collaborative practice with referral community to maximize success of orthodontic therapies and increase referrals

**ODA COURSE**

**Not Your Typical Gingivitis**

**PRESENTED BY** F. James Kratochvil, DDS

**RECOMMENDED FOR** D H A

1 - 2:30 PM  
COURSE NUMBER 9173  
ODA course  
CE CREDITS 1.5

We are all very familiar with the common plaque and calculus related gingivitis and periodontitis. This presentation will not be about those common diseases, but will cover some common and unusual or unexpected, often non-plaque related, forms of disease that involve the gingiva. Some of the diseases that will be covered are the various types of desquamative gingivitis, common growths on the gingiva. Some of the diseases that will be covered are the various types of desquamative gingivitis, common growths on the gingiva, gingival diseases that are considered to be premalignant and outright malignant neoplastic processes on the gingiva, gingival diseases that are considered to be various types of desquamative gingivitis, common growths on the gingiva. Introduction to Treating Sleep Apnea in Your Practice
From Getting Started to Medical Billing

Presented by Mark Murphy, DDS

Recommended for: D H A OM

8 - 11 AM  |  Course Number: 9180

ODA course | CE Credits: 3

This course allows the general practitioner to survey the current landscape of medical and dental treatments for sleep apnea and decide how and if they want to evolve into this. The overview covers marketing, physician communication, treatment philosophies, appliances, billing and the financial/ emotional impact on your practice and team. Sleep medicine has progressed in both the diagnosis and treatment protocol and outcome predictability. It is estimated that 25% of the population is at risk for this life-threatening condition and dentistry is at the frontlines. Dr. Murphy will provide an overview of how to recognize and treat sleep apnea and patient education. This course is an overview to help you determine if you want to treat these patients. It is not a substitute for full training in sleep dentistry.

At the conclusion of this course, attendees will have:

- General understanding of the sleep related conditions and the role of the dental team
- Effective communication with physicians and their offices
- Developed a matrix for marketing sleep appliance therapy to current patients and prospects
- An overview of the medical billing process and the financial and emotional impact on your practice

Advanced Communication Skills for Dental Teams

Presented by Mark Murphy, DDS

Recommended for: D H A OM LT

1 - 4 PM  |  Course Number: 9181

ODA course | CE Credits: 3**

In this half-day program, Dr. Murphy provides a light and very entertaining program full of useful tips and ideas that you can put to use on "Monday morning." This presentation is very well suited to a combined audience of doctors, staff, and even spouses. By understanding the communication process, how it works, and why it sometimes doesn’t, you will be more effective and comprehensible within the practice team and with patients, friends, and family. Teams will get along better and patients will say yes more often to you and to your treatment plans when you develop relationships that encourage mutually agreed upon outcomes that are based on trust. Your goals are to know the patient well enough to competently recommend an optimal course of treatment for that patient, communicate well enough with the patient to arrive at "informed" consent, and develop sufficient trust with that patient to get to yes.

At the conclusion of this course, attendees will:

- Understand principals of communication and their application with patients and dental teams
- Develop strong active listening skills
- Use the learning ladders as a patient education assessment tool

**This course appears to meet the Oregon Board of Dentistry’s requirements for CE related to practice management and patient relations.
**David Ahearn, DDS**............................................................. PAGES 16, 24

Dr. Ahearn is first and foremost a full time practicing dentist whose office ranks among the nation’s most productive practices. Trained at the University of Michigan, Dr. Ahearn’s introduction to the Toyota Production LEAN Principles and the subsequent application of them to dentistry began a quality and productivity revolution that is at the heart of his design work. As a result, he founded Design/Ergonomics, the nation’s largest independent dental office design firm, as well as Ergonomic-Products, a manufacturer of high-productivity, ergonomically sound dental equipment. These organizations work in tandem to design and equip comfortable, productive, and highly cost-effective practices.

Conflict of Interest Disclosure: None

**Melissa Amundson, DDS**.................................................. PAGE 10

Dr. Amundson received her dental degree at University of Illinois. She completed her residency in oral and maxillofacial surgery at the University of Miami/Jackson Memorial Hospital, in 2012, which was the only level one trauma center in Dade County at the time. She followed this with three years of private practice and voluntary faculty with the Department of Plastic Surgery at Hospital Escuela in Tegucigalpa, Honduras, teaching facial trauma. She returned to academics in 2015 and completed an advanced trauma/CMF fellowship at Legacy Emanuel Hospital in trauma and post traumatic reconstruction. She has interests in maxillofacial trauma, dentoalveolar surgery, dental implants and orthognathic surgery. Additionally, she is involved in the Noma project with Doctors Without Borders (MSF) in Northern Nigeria. In her free time, she enjoys yoga, traveling, and volunteer mission work.

Conflict of Interest Disclosure: None

**Homayon Asadi, DDS**.................................................... PAGES 16, 23

Dr. Asadi is the interim co-chair of the preventive and restorative dentistry department, and an associate professor and a course director of anatomy and histology for the department of biomedical sciences at University of the Pacific, Arthur A. Dugoni School of Dentistry. He has been actively involved in academics for over 25 years, both lecturing and dissection on many subjects. Dr. Asadi lectures frequently, is a member of several honor societies including OKU and American as well as International College of Dentists. He has been recognized and honored for distinguished merit in teaching and he also maintains a private practice in cities of San Jose and Hollister, California.

Conflict of Interest Disclosure: None

**Normund Auzins, DDS**.................................................. PAGE 16

Dr. Auzins is a board certified oral and maxillofacial surgeon who practices in Portland. He received his dental degree and certificate of residency at Indiana University. He held a faculty position at Portsmouth Naval Hospital while in the U.S. Navy as well as serving in the Middle East for two deployments. Currently, Dr. Auzins is a part time faculty member at the OHSU School of Dentistry where he has been the course director for “Medical Emergencies in the Dental Practice” for the past 5 years. He serves on the board of the Multnomah County Dental Society and is the current president of the Oregon Society of Oral and Maxillofacial Surgery. He actively volunteers locally and internationally with Medical Teams International and the Free to Smile Foundation. His cleft lip and palate experience has taken him to Tibet, Guatemala, Niger, and Ethiopia, and the Philippines.

Conflict of Interest Disclosure: None

**Samuel Barry, DMD** .......................................................... PAGE 17

Dr. Barry received his Doctor of Dental Medicine degree from the OHSU School of Dentistry in 1982 and then maintained a private general dental practice in Pendleton, Oregon, for 15 years. He was an instructor in the Blue Mountain Community College dental assistant program for 12 years. Dr. Barry is currently a field sales consultant with Henry Schein Dental, based in Pendleton, Oregon. In 2006 he was trained by Health Professions Training Consultants, Inc., as an OSHA trainer and has presented numerous classes on OSHA/WISHA compliance, bloodborne pathogens, and infection control. He is currently a member of the Organization for Safety Ascepsis and Prevention, the American Dental Association, the Oregon Dental Association, and the Eastern Oregon Dental Society. His class is recommended by both NORDIC and DBIC Insurance Companies as an important component of overall risk management.

Conflict of Interest Disclosure: Dr. Barry’s ODC courses are being sponsored by Henry Schein Dental. He is employed by Henry Schein Dental.

**Steven Beadnell, DMD** ..................................................... PAGE 10

Dr. Beadnell is a board-certified oral and maxillofacial surgeon who has been in private practice in Portland since 1991. He received his DMD degree from OHSU School of Dentistry in 1980 and he completed his oral and maxillofacial surgery residency at David Grant USAF Medical Center in 1988. He was previously an adjunct associate professor in the department of oral and maxillofacial surgery at OHSU School of Dentistry. He lectures extensively to various dental groups throughout the Northwest.

Conflict of Interest Disclosure: None

**Daniel Blickenstaff, DDS, MSc** .................. PAGE 10

Dr. Blickenstaff was born and raised in the Mother Lode area of northern California, and earned a BSc, MSc, and DDS from the Ohio State University, graduating from the College of Dentistry in 1977. He was a clinic instructor in restorative dentistry at OSU from 1982 to 1985, while practicing in Grandview Heights, Ohio. In 1993, Dr. Blickenstaff returned to the west coast and practiced in the Portland area until 2013. He taught restorative dentistry to dental hygiene students at Portland Community College from 2011 to 2016, and performed independent medical examinations for numerous insurance companies since 2007. In 2015 Dr. Blickenstaff joined the Board of Dentistry as a consultant/investigator, and became a full-time investigator in January 2016.

Conflict of Interest Disclosure: None

**Stacy Bone, EFDA** .......................................................... PAGE 10

Ms. Bone studied community and public health education at Portland State Univ., which helped direct her along a path of helping people and creating a community through yoga. Her experiences as a professional dental assistant and passion for yoga has motivated her to share its benefits with others in her community. Ms. Bone has been practicing yoga for over 8 years and has completed the 200-hour yoga teacher training, certified by the Yoga Alliance. In addition, she is the Professional Development & Educational Coordinator for at the PCC CLIMB Center Institute for Health Professionals, leading the new Integrated Community Online Dental Assisting program. Ms. Bone strives to connect with all of her students and prides herself on designing classes that are meaningful and motivating. She encourages all levels of yogis to join her classes.

Conflict of Interest Disclosure: None

**Christopher Bormes, MICOI** .......................... PAGE 17

Mr. Bormes graduated from Gonzaga University prior to attending the dental laboratory technology program at City College of San Francisco. He has earned both ICOI fellowship and mastership in dental technology and is a candidate for CDT in complete dentures. Mr. Bormes has designed multiple attachments and restorative components and wrote the PREAT Corporation technical manual. He has lectured both nationally and internationally and is recognized as an expert in attachments and implantology. Mr. Bormes joined PREAT Corporation in 1997 and was named president in 2010.

Conflict of Interest Disclosure: Mr. Bormes is a stock shareholder and employed by PREAT Corporation.
Allen Cheng, DDS, MD ........................................PAGE 24
Dr. Cheng earned his medical, dental degrees, and residency
training at the University of California, San Francisco and
he has finished fellowships in head and neck oncology and
microvascular reconstructive surgery. He is a Diplomate
of the American Board of Oral and Maxillofacial Surgery
with a certificate of added qualification in oral/head and neck surgery
and reconstructive surgery. Dr. Cheng’s research is in oral/head and
neck oncology and reconstructive surgery and he speaks nationally and
internationally. He is the section chair of oral and maxillofacial surgery at
Legacy Emanuel Hospital and the medical director of oral/head and neck
cancer at Legacy Good Samaritan Cancer Center.
Conflict of Interest Disclosure: None

Carla Cohn, DMD ........................................PAGE 24
Dr. Cohn is a general dentist, devoted solely to the practice of
dentistry for children. She maintains a private practice at Kids
Dental in Winnipeg, Canada. She is proud to be a member of Catapult Elite, Pierre Fauchard Academy and has been
named as Leader in Continuing Education multiple years in a
row. Dr. Cohn has published several articles, and webinars and she enjoys lecturing on all aspects of children’s dentistry for the general practitioner both nationally and internationally.
Conflict of Interest Disclosure: Dr. Cohn’s ODC courses are sponsored, in part, by
DMG America, NSK Dental, Endodont, and VOCCO.

Charles Czerepak, DMD ........................................PAGE 10
Dr. Czerepak graduated from Fairleigh Dickinson University
Dental School in 1977. He is the founder of Pine Dental Care,
a community-based private practice dedicated to the dental and
oral health of children. He has served as the president of the medical/dental staff at the former Children’s Memorial
Hospital, interim head of the Division of Dentistry at CMH and is a trustee of the American Academy of Pediatric Dentistry.
Conflict of Interest Disclosure: None

Eric Dierks, MD, DMD, FACS, FACD, FRCS(Ed) ........................................PAGE 10
Dr. Dierks is a graduate in both medicine and dentistry
from the University of Louisville. His residency in oral and
maxillofacial surgery was done at the Christiana Medical
Center of Delaware, and his residency in otolaryngology –
head and neck surgery – was completed at the University of Texas Southwestern Medical Center at Dallas (Parkland Hospital). He is board-certified in both specialties. Dr. Dierks was on the full-time ENT faculty at the University of Texas prior to moving to Portland. His practice consists of head and neck oncologic and reconstructive surgery, cranio-maxillofacial trauma, as well as traditional oral surgery. He has over 100 publications related to his areas of interest.
Conflict of Interest Disclosure: Dr. Dierks has received honorarium support from KLS
Martin in the last 12 months.

Teresa Duncan, MS, FAADOM ............PAGES 11, 17, 18
With over 20 years of health care experience, Ms. Duncan
addresses topics such as insurance coding, office manager
training, and revenue growth. Her leadership positions include the
National Speakers Association and the Academy of Dental Management Consultants. She has been named one of the
Top 25 Women in Dentistry and is the author of Moving Your Patients to
Yes: Easy Insurance Conversations as well as a contributing author to the
ADA’s annual CDT companion guides. Her podcast “Nobody Told Me That!”
provides regular coding and management updates. Ms. Duncan received her
master’s degree in healthcare management.
Conflict of Interest Disclosure: Ms. Duncan's ODC courses are sponsored, in part, by
CareCredit. She is a consultant for Philips Healthcare.

Cynthia Durley, Med, MBA ..................PAGE 10
Ms. Durley is executive director of both the Dental Assisting
National Board (DANB, the national certification organization for dental assistants) and the DALE Foundation (DANB’s
official affiliate). She has been employed by DANB for over
30 years and by the DALE Foundation since its incorporation
in 2010. In her dual role of executive director to both DANB and the DALE
Foundation, Ms. Durley provides leadership in organizational governance,
fiscal accountability, and administrative, operations, and personnel
management. She also promotes the respective missions of DANB and the
DALE Foundation, and ensures that each organization’s interests are
represented at the state and national levels. Ms. Durley has held a number of
leadership positions in national associations and organizations. She served as
president of the American Association of Dental Administrators. She was
also elected president by the membership of the Institute for Credentialing Excellence (ICE) and served on the ICE Executive Committee from
2006–2008. She continues to be active in ICE, with prior service on ICE’s
research and development committee as co-chair of the benchmarking best
practices in certification task force and ICE’s assessment-based certificate
program accreditation standards task force, and current service on the ICE
Leadership Council, the ICE CEO Summit Committee, and the ICE Editorial
Digest Committee. Prior to her work with the DALE Foundation and DANB,
Ms. Durley was manager of examination development and services at the
Academy of General Dentistry for four years, during which time she was also executive secretary of the Certifying Board of General Dentistry (now the
American Board). She has developed examinations and evaluated curricula for the U.S. Navy and taught basic statistics, testing, and measurement
courses at Loyola University of Chicago. Ms. Durley has a bachelor’s degree
in biology from the University of Notre Dame, a master’s degree in education
from Loyola University of Chicago, and a master’s degree in business
administration from DePaul University.
Conflict of Interest Disclosure: None

EMT Associates ........................................PAGES 11, 18, 24
EMT Associates has been an American Heart Association training site for
over 10 years. Many of its staff have been American Heart Association
instructors and volunteers for over 30 years. EMT Associates’ instructors
serve the state of Oregon, southern Washington and northern California.
Conflict of Interest Disclosure: Instructors for ODC CPR sessions are employees of EMT Associates.

Debra Engelhardt-Nash ..................PAGES 11, 18
Ms. Engelhardt-Nash has been in dentistry since the early 80s and a speaker/consultant for over 30 years. She has
presented workshops nationally and internationally for numerous study groups and organizations and has written
for a number of dental publications including two oral hygiene
magazines; she has been honored twice as author of the year for her
contributions. Ms. Engelhardt-Nash is co-founder and instructor for The Nash
Institute for Dental Learning, located in Huntersville, NC. She is a founding
member and served two terms as president of the National Academy of
Dental Management Consultants and is the first recipient of the Charles Kidd
Meritorious Service Award presented by the ADMC. She is once again their
acting president. Ms. Engelhardt-Nash is also a member of the American
Academy of Dental Practice Administration, Administrators Consulting Network
and a Fellow in the International Academy of Dental Facial Esthetics. Because of
her contributions to the industry of dentistry, Ms. Engelhardt-Nash received the Kay Moser Distinguished Service Award given by the American Dental
Assistants Association in 2008. This is her twelfth year being recognized by
Dentistry Today as a top consultant and speaker. She is the 2015 recipient of the Chicago Dental Society Gordon Christensen Outstanding Lecturer
Recognition Award. Ms. Engelhardt-Nash continues to work in the “real
world” of dentistry – when she is not consulting or speaking, she is working with an amazing team in a fee-for-service practice in the Charlotte, NC, area.
Conflict of Interest Disclosure: None
Peter Fay, DMD .......................... PAGE 18
After graduating from the University of Pennsylvania School of Dental Medicine in 1981, Dr. Fay completed a one-year general practice residency at Mt. Sinai Medical Center in Miami Beach, Florida. He then spent two years obtaining his prosthodontics specialty certification at the Veterans Administration Hospital in Houston, Texas, the University of Texas at Houston Dental Branch, and the MD Anderson Hospital and Tumor Clinic. Since 1984, Dr. Fay has been in private practice in Maui, Hawaii, is a visiting faculty member at the Pankey Institute, and is a speaker with the Growth Into Greatness dental practice management company.
Conflict of Interest Disclosure: None

Allen Finkelstein, DDS .......................... PAGE 10
Dr. Finkelstein is the CEO of Bedford Healthcare Solutions. He has been the chief dental officer at Prev/MED Onsite HealthCare Services and AmeriChoice-Medicaid Division of United Health Group. He has served as a dental consultant for Horizon Blue Cross/Blue Shield of New Jersey.
Conflict of Interest Disclosure: None

Ronald Fritz, DDS, MPH .......................... PAGE 18
Dr. Fritz graduated from the School of Public Health and the School of Dentistry as a DMA in 1972. What impacted his mission spirit most during these years was the four weeks he spent as a student missionary at Monument Valley Dental Clinic serving patients from the Navajo Nation. This confirmed his decision to go into international mission service after graduation. But instead of going to Nairobi, Kenya, as originally planned, he took the Puerto Rico licensing exam and moved to Bella Vista Hospital in Mayagüez. There, he served as dental director of the hospital and Policlínica Bella Vista, while learning Spanish. Six years later, Dr. Fritz moved back to private practice in Escondido, Calif., teaching part time at Loma Linda University. The Latin influence and mission spirit never died, and he continued to do short term mission service in Latin America. Today, he is mostly retired but active in mission service with LULU, Flying Samaritans, Flying Doctors, and the Academy of Dentistry International – with whom he is a Fellow, serves as Vice President for Education, and Chair of the USA Section.
Conflict of Interest Disclosure: None

Judah Garfinkle, DMD, MS .......................... PAGE 11
Dr. Garfinkle earned his DMD from the Harvard School of Dental Medicine, his MS and orthodontic certificate from the University of Kentucky, and completed a fellowship in craniofacial orthodontics at NYU Institute of Reconstructive Plastic Surgery. Dr. Garfinkle is a Diplomate of the American Board of Orthodontics and a reviewer for numerous scientific journals. Dr. Garfinkle has published numerous articles in peer-reviewed journals and authored multiple book chapters on the technique of nasoalveolar molding. He currently serves as the Director of Craniofacial Orthodontics at OHSU and maintains a private orthodontic practice where he is the leading provider in craniofacial conditions, and he is currently the president of their Board of Directors.
Conflict of Interest Disclosure: None

Steven Geiermann, DDS .......................... PAGE 10
A retired USPHS Captain with experience in the Indian Health Service and Federally Qualified Health Centers, Dr. Geiermann was a HRSA regional dental consultant for more than a decade while building a strong oral health infrastructure aligned with overall health care. He currently serves on the ADA’s Council on Advocacy for Access and Prevention and is an officer and board member of the National Network for Oral Health Access.
Conflict of Interest Disclosure: None

Edie Gibson, RDH, MS .......................... PAGES 24, 25
Ms. Gibson is a charismatic, knowledge-wealthy trainer with a mission and passion to affect CHANGE! She brings over 30 years of hands-on clinical and business expertise in implant dentistry to the podium; she peppers her programs with wit and humor, making difficult subjects fun, relevant, and thought-provoking for the entire team. Ms. Gibson owned an independent dental hygiene practice, called About Face Dental Hygiene Spa until spinal surgery ended her full-time clinical career and changed the course of her life. As the founder and CEO of EGibson Consulting, Ms. Gibson offers life-changing seminars designed to empower participants to “get unstuck from their stuckness.” She was honored to be the first hygienist invited to speak in Saudi Arabia for the Saudi Dental Society. She is the Senior Director of Clinical Education and Training for Clarionay, a 2013 Sunstar RDH Award of Distinction recipient, and a Clinical Advisor for the Implant Consortium. Ms. Gibson is also a thought leader/key opinion leader for several prestigious dental companies, serves as editor for RDH New Grad e-newsletter, is a registered psychotherapist, and is a contributing author to the bestselling book, Overcoming Mediocrity.
Conflict of Interest Disclosure: None

Kathryn Gilliam, BA, RDH, FAAOSH .......................... PAGE 11
Ms. Gilliam is a practicing clinician, author, speaker, and coach who empowers dental professionals to elevate their standard of care with protocols based on sound scientific principles. Under her guidance, dental hygienists become oral healthcare practitioners who powerfully impact the lives and health of their patients. Ms. Gilliam’s interest in the medical side of dentistry led her to years of advanced study of the oral–systemic link, including twice completing the prestigious Bale Doneen Preceptorship for Cardiovascular Disease Prevention for Healthcare Practitioners. Her company, PerioLinks, LLC, was created to train dental teams to transform their practices to care for the total health of their patients. She is an honors graduate of the University of Nebraska and the University of Texas. She has published numerous continuing education courses and articles, and serves on the editorial board of DkW Life magazine. Her motto: “We’re not just cleaning teeth, we’re saving lives.”
Conflict of Interest Disclosure: None

Charles Goodis, DDS .......................... PAGE 12
Dr. Goodis is the owner of EdgeEndo, a heat-treated NiTi rotary file distributor and U.S. Endodontics, a heat-treated NiTi rotary file manufacturer. His undergraduate major was mechanical engineering at the University of Michigan where he also went to dental school. He did a GPR at the University of Minnesota and received his endodontic certificate at the University of Connecticut.
Conflict of Interest Disclosure: Dr. Goodis is an owner at EdgeEndo.

David Guichet, DDS .......................... PAGE 25
Dr. Guichet is a Diplomate of the American Board of Prosthodontics and a graduate of the maxillofacial prosthetics residency at UCLA. He completed a prosthodontic residency at the VAMC Wadsworth in West Los Angeles, a GPR at the VAMC in Long Beach, CA, and received a DDS from UCLA. Dr. Guichet served as program chair for the Academy of Osseointegration, the American College of Prosthodontists and the Pacific Coast Society for Prosthodontics. He served as editor for the Academy of Osseointegration news and is past president of the Osseointegration Foundation and the Orange County Dental Society. He was the director of continuing professional education for the American College of Prosthodontics and has chaired the ACP Digital Dentistry Symposium for the last three years. Dr. Guichet serves on the Board of Directors for the Pacific Coast Society for Prosthodontics. Together, with his brother, he maintains a prosthodontic practice in Orange and Newport Beach, California, where he has installed a comprehensive digital, clinical and laboratory CAD/CAM process.
Conflict of Interest Disclosure: None
SPEAKER BIOGRAPHIES

David Hatcher, DDS, MSc, MRCD(C) ........................................... PAGES 16, 23
Dr. Hatcher received his DDS degree from the University of Washington and was granted a specialty degree in oral and maxillofacial radiology and an MSc from the University of Toronto. Presently Dr. Hatcher is in private practice in Sacramento, California, and has faculty appointments as clinical professor at UCLA, UCSF, UCD, Roseman University, and the University of Pacific, Arthur A. Dugoni School of Dentistry.
Conflict of Interest Disclosure: None

Teresa Haynes ......................................................... PAGE 10
Ms. Haynes began her career with the Oregon Board of Dentistry over 30 years ago. During her career with the Board, she served as receptionist, licensing and examination manager and office manager. She has licensed over 8,870 dentists and dental hygienists and has issued over 15,000 dental assistant certificates.
Conflict of Interest Disclosure: None

Leigh Anne Jasheway, MPH ............................................ PAGE 12
Ms. Jasheway is a stress management and humor expert who helps people manage stress, embrace change, and become healthier by learning to lighten up. She speaks at 30–40 conferences and workshops every year and is a member of the Association for Applied and Therapeutic Humor (AAATH). She is the author of 24 books, including Don’t Get Mad, Get Funny; Not Guilty by Reason of Menopause; 101 Comedy Games for Children and Grown-Ups; Date Me, Date My Dog; and The Stressed-Out Woman’s Guide to Letting Go with Laughter. She won the national Erma Bombeck Humor Writing Award for her true story on how her first mammogram caught on fire. Ms. Jasheway teaches at Lane Community College, and previously taught at the University of Oregon. She is also the humor columnist for the Register Guard’s “Weekend” and the former host of the “Giggle Spot” on All Comedy 1450 AM. You can get regular humor and stress management tips at “Don’t Get Mad, Get Funny” on Facebook.
Conflict of Interest Disclosure: None

Ginny Jorgensen, CDA, EFDA, EFODA, AAS ............... PAGES 10, 12, 25
Ms. Jorgensen began her career as an orthodontic and general chairside assistant. After 18 years of clinical experience she worked as a dental training specialist for the Kaiser Permanente dental program. Ms. Jorgensen graduated from Portland Community College with an associate degree in professional technical education and was employed as the full time clinical dental assisting instructor at Portland Community College from 1998 to 2014. She is an approved speaker on bloodborne pathogens for the National Association of Dental Laboratories, and the owner of Smith & Jorgensen Dental Consulting. Ms. Jorgensen is a founding Board of Trustee member (2010–2017) of the Dental Auxiliary Learning Education (DALE) Foundation and served two years as its president.
Conflict of Interest Disclosure: Ms. Jorgensen is the owner of Smith & Jorgensen Dental Consulting.

Solon Kao DDS, FICD ................................................... PAGES 12, 18, 19
Dr. Kao attended dental school in the University of Tennessee—Memphis and received his OMS training at Medical College of Georgia in Augusta. He is an assistant professor of OMS and the deputy OMS residency program director at Georgia Health Science University in Augusta. He truly enjoys teaching, and is very popular among the dental student resident population at school. He received the outstanding faculty award for 2015 and practices full scope OMS. Dr. Kao has lectured extensively in the southeast region and is involved in live patient hands-on dental implant continuing education courses abroad.
Conflict of Interest Disclosure: None

Natalie Kaweckyj, LDA, RF, CDA ......................... PAGE 10
Ms. Kaweckyj is a licensed dental assistant with restorative functions from Minneapolis. Holding all six of DANB’s certifications, Ms. Kaweckyj includes continuing education a top priority in her busy dental career. As a longtime leader in the dental assisting profession, she has practiced academically, administratively, clinically, as well as legislatively, with over 25 years of experience in a variety of settings. She served on the ADAA Board of Trustees for 12 years ending in 2012, and is currently serving as ADAA president again. She graduated from an ADA accredited dental assisting program, and holds a bachelor’s degree in biology and psychology from Metropolitan State Univ. She served six years on DANB’s infection control test construction committee, on the CODA dental assistant review committee, and holds membership in many dental-related organizations. An acclaimed author of numerous articles and courses, Ms. Kaweckyj enjoys interacting with dental professionals on a variety of topics making even the driest of topics exciting and fun to learn!

Paul Kleinstub, DDS, MS .......................... PAGE 10
Dr. Kleinstub received a BS degree in zoology from the Ohio State University in 1962 and his DDS degree from the Ohio State University College of Dentistry in 1966. During his 20-year career in the United States Air Force, he also completed a two-year general dentistry residency and received a MS degree from the University of Texas Dental Branch at Houston. He retired from the Air Force Dental Corps in 1986 after achieving the rank of Colonel. After a short stint in private practice, he began employment with the Oregon Board of Dentistry. During his 27-year career with the Board he has served as an investigator, chief investigator, dental director, and – on two occasions – as the Board’s interim executive director.
Conflict of Interest Disclosure: None

Mark Kleive, DDS .................................................... PAGE 12
Dr. Kleive earned his DDS degree with distinction from the University of Minnesota School of Dentistry in 1997. Dr. Kleive has the experience of being an associate in a multi-clinic setting, as well as being an owner of two different fee-for-service practices. For the last seven years he has practiced in a beautiful area of the country – Asheville, North Carolina. Dr. Kleive is a visiting faculty member with the Pankey Institute and a 2015 inductee into the American College of Dentistry. During the last 20 years of practice, Dr. Kleive has made a reputation for himself as a caring, comprehensive oral healthcare provider.
Conflict of Interest Disclosure: None

Anne Koch, DMD .................................................. PAGE 26
Dr. Koch received both her DMD and certificate in endodontics from the University of Pennsylvania. She is also the founder and past director of the postdoctoral program in endodontics at the Harvard School of Dental Medicine. Following her clinical and academic career, Dr. Koch formed her own successful technology and development company, Real World Endo, where she was CEO and president. Dr. Koch is the holder of multiple patents and maintains a faculty position at Penn as well as serving as a Senior Fellow. She also is a member of the Board of Overseers for the University of Pennsylvania School of Dental Medicine.
Conflict of Interest Disclosure: Dr. Koch’s ODC course is being sponsored by Real World Endo. She is owner of Real World Endo and has received material support from Brasseler USA in the last 12 months.

Early bird deadline: February 23. Register online at www.OregonDentalConference.org

COURSE HANDOUTS
Access course handouts online at www.oregondentalconference.org, or through the ODC Mobile App, starting on March 22.
SPEAKER BIOGRAPHIES

James Kohn, DDS ........................................ PAGE 13, 19
Dr. Kohn is originally from Cleveland. He graduated from the Ohio State University, and Case Western Reserve University Dental School, then obtained his certification in periodontics from the Boston University School of Graduate Dentistry. He currently lives in Denver. Dr. Kohn is an experienced teacher who has presented courses on crown lengthening, soft tissue grafting, and antimicrobial treatment for periodontal disease to a wide range of audiences, including many state associations, across the US and in eight foreign countries. He has also presented at the American Academy of Periodontology meetings for many years. Dr. Kohn has been teaching for the Perio Institute since 2003. He is a current member of both the ADA and the American Academy of Periodontology, and a professional member of the National Speakers Association.

Conflict of Interest Disclosure: None

Mariah Kraner, MA, PhD ................................. PAGE 10
Ms. Kraner joined the A-dec team in 2014. She has over 15 years of experience managing complex global teams, conducting research and teaching corporate and collegiate courses. Prior to joining A-dec, Ms. Kraner managed large-scale research programs, including a federal grant-funded randomized control trial to enhance employee health and performance. She has worked for and consulted with Fortune 500 companies managing programs for executive leadership training and development. Ms. Kraner spent time living and working abroad in Serbia, Scotland, and Ecuador, and has a passion for launching new initiatives and using evidence-based research to enhance organizational outcomes. She holds a doctorate in public affairs and policy from Portland State University, a masters degree in adult education and political science from Oregon State University, and a bachelor’s degree in international relations from Willamette University.

Conflict of Interest Disclosure: None

F. James Kratochvil, DDS ............................. PAGE 26
Dr. Kratochvil is presently laboratory director of Northwest Oral Pathology in Tigard, Oregon. He is an affiliate associate professor in the department of pathology at OHSU School of Medicine. Previously he was chairman and laboratory director of the department of pathology and radiology at OHSU School of Dentistry and chairman and laboratory director of the department of oral pathology at the National Naval Dental Center in Bethesda, Maryland. He has been a director and president of the American Board of Oral and Maxillofacial Pathology.

Conflict of Interest Disclosure: None

Stuart E. Lieblich, DMD ................................. PAGE 25
Dr. Lieblich graduated from Rutgers University (Highest Honors, 1977) and the University of Pennsylvania School of Dental Medicine (1981). He completed his residency in oral and maxillofacial surgery at Kings County/Downstate Medical Center in New York. In 1984, he assumed a full-time position on the faculty of the University of Connecticut until 1988. Currently, Dr. Lieblich is in private practice in Avon, Connecticut, and maintains a part-time teaching appointment at the university as clinical professor. At the University of Connecticut, he lectures to the medical and dental students on head and neck anatomy (with special focus on the temporomandibular joint and the anatomy of orthognathic surgery) and also to the various postgraduate residency programs. Dr. Lieblich is on the medical staff at Hartford Hospital, Connecticut Children’s Medical Center, St. Francis Hospital, John Dempsey Hospital (University of Connecticut Health Center), and Charlotte Hungerford Hospital (head, section of oral and maxillofacial surgery).

Conflict of Interest Disclosure: Dr. Lieblich is a consultant for Pacira Pharmaceuticals, Inc.

Denis Lynch, DDS, PhD ................................. PAGE 13, 20
Dr. Lynch received his DDS degree from the University of California at San Francisco in 1976. He subsequently completed a residency in oral and maxillofacial pathology at the University of Alabama at Birmingham, as well as a PhD in experimental pathology. Dr. Lynch joined the faculty of the University of Texas Dental Branch at Houston in 1981, eventually serving as executive associate dean. In 1993 he went to the University of Tennessee Memphis as executive associate dean of the College of Dentistry and served as both professor of dentistry and professor of medicine until 2002. Dr. Lynch is currently professor of oral and maxillofacial pathology and, from 2002 until 2015, was the associate dean for academic affairs at Marquette University School of Dentistry. He is also professor of dermatology and otolaryngology – head and neck surgery – at the Medical College of Wisconsin. Dr. Lynch is the author of numerous scientific articles and book chapters, as well as the co-author of The Mouth: Diagnosis and Treatment. In 2009 Dr. Lynch was the 72nd recipient of the UCSF Dental Alumni Association Medal of Honor, the highest honor bestowed by the association on one of its members. In 2012 Dr. Lynch was awarded a University Doctorate, honoris causa, from the Victor Babes University of Medicine and Pharmacy in Timisoara, Romania. Dr. Lynch was also inducted into the Irish 100, composed of the 100 most influential educators in the United States with Irish heritage. Since 2013, Dr. Lynch has been an examiner for the faculty of dentistry of the Royal College of Surgeons in Ireland.

Baldwin Marchack, DDS, MBA ........................ PAGE 27
Dr. Marchack is a 1971 graduate of the Ostrow School of Dentistry of USC. In 1989 he received his MBA from the Anderson Graduate School of Management. He is a Fellow of the American College of Dentists, a Fellow of the International College of Dentists and a Fellow of the Pierre Fauchard Academy. He is a member of the Academy of Prosthodontics, the International College of Prosthodontists and the Academy of Osseointegration, and he is past president of the American Prosthetic Society, past president of the American Academy of Esthetic Dentistry and past president of the Osseointegration Study Club of Southern California. Dr. Marchack is a former examiner for the California State Board of Dental Examiners. He is an honorary member of the American College of Prosthodontists and serves on the Board of Councilors of the Ostrow School of Dentistry of USC and is president of the executive council for the International Federation of Esthetic Dentistry. Dr. Marchack is the course director for the USC Esthetic Dentistry Training Program in Shanghai, China, and course director for the USC Comprehensive Surgical and Restorative Implant Training Program in Hong Kong. He is currently the chair of the editorial council for the Journal of Prosthetic Dentistry and he maintains a private practice in Pasadena, California.

Conflict of Interest Disclosure: Dr. Marchack has received honorarium support from Nobel Biocare USA in the past 12 months.

Judy Kay Mausolf ................................. PAGE 26
Ms. Mausolf is a dental practice management coach, speaker and author with expertise in helping others get happier and more successful. She coaches dentists and their teams how to become better leaders, communicate positively and effectively, work together better, and deliver service with more passion and focus which ultimately result in growing their practice. Ms. Mausolf is past president of the National Speakers Association Minnesota Chapter, a member of the National Speakers Association, Academy of Dental Management Consultants, and director of sponsoring partners for the Speaking Consulting Network. She is author of two books, TA-DAH! Get Happy in 5 Seconds or Less and Rise & Shine: An Evolutionary Journey to Get Out of Your Way and On Your Way to Success, and a contributing author for many dental publications.

Conflict of Interest Disclosure: Ms. Mausolf’s ODC courses are sponsored, in part, by CareCredit.
SPEAKER BIOGRAPHIES

Kristy Menage Bernie, RDH, MS, RYT ........................................... PAGE 26
Ms. Menage Bernie is the director of Educational Designs, a national corporate consulting company based in San Ramon, CA, and she is also a registered yoga teacher. She celebrated her 30th year in the profession by completing an MS degree with honors in 2015 from the University of California, San Francisco, where she is also an assistant clinical professor. Ms. Menage Bernie is an international speaker on a variety of topics as well as a facilitator of workshops for educators in dentistry. She has been quoted in Esquire and Women’s Health magazines, interviewed by ESPN Radio, and featured on the cover of RDH magazine. Ms. Menage Bernie has been featured on major dental and dental hygiene conventions and is known for facilitating interactive, fast-paced sessions based on the latest technologies and research.
Conflict of Interest Disclosure: None

George K. Merijohn, DDS ........................................... PAGE 20
San Francisco periodontist, Dr. Merijohn, has practiced 28 years and is an associate clinical professor in postdoctoral periodontics at UCSF and the University of Washington. He is a leading clinician and educator in periodontics and an authority on gingival recession prevention, management, and minimally invasive surgery. Dr. Merijohn has authored articles on gingival recession and the evidence-based approach; he publishes, consults, lectures internationally, and leads gingival grafting workshops. Dr. Merijohn serves on the editorial board of the Journal of Evidence-Based Dental Practice and is the founder and director of the Meadowood Dental Study Club in Napa Valley, California.
Conflict of Interest Disclosure: Dr. Merijohn’s ODC courses are sponsored, in part, by Colgate.

Shannon Mills, DDS ........................................... PAGE 20
Dr. Mills graduated from Baylor College of Dentistry in 1977 and served for 28 years in the Air Force. In 2005, he joined the faculty of the University of Nevada School of Medicine in Las Vegas. From 2007 until 2016, he was vice president for professional relations at Northeast Delta Dental in Concord, NH, where he led a team that created the first evidence-based dental benefit plan based on digital risk assessment. Since 2016, he has been the vice president for strategy and business development at PreViser Corporation, a healthcare analytics company specializing in population oral health management.
Conflict of Interest Disclosure: Dr. Mills is employed by PreViser Corporation.

Ben Miraglia, DDS ........................................... PAGE 13
Dr. Miraglia graduated from the SUNY at Buffalo School of Dental Medicine. He has 24 years general practice experience in Mt. Kisco, NY, including 14 years interceptive orthodontic experience where his focus has been on early childhood growth and development. Dr. Miraglia lectures nationally on childhood sleep disordered breathing and its impact on early childhood development. Dr. Miraglia holds faculty positions with Align Technology and is on the Board of Directors of the American Academy of Physiological Medicine and Dentistry. He is on the President’s Council of Northern Westchester Hospital in Mt. Kisco, NY. Dr. Miraglia has been recognized as a “Leader in Continuing Education” by Dentistry Today magazine since 2015.
Conflict of Interest Disclosure: None

Mark Murphy, DDS ........................................... PAGE 27
Dr. Murphy is the principal of Functional Business Consulting and lead faculty for clinical education at ProSomnus. He serves on the guest faculty at the University of Detroit Mercy and as a regular presenter on business development, practice management and leadership at the Pankey Institute. He has served on the Boards of Directors of the Pankey Institute, Identalloy Council, the Foundation for Dental Laboratory Technology, St. Vincent DePaul’s Dental Center and The Dental Advisor. Dr. Murphy lectures internationally on leadership, practice management, communication, case acceptance, planning, dental sleep medicine, occlusion and TMD. He has a knack for presenting pertinent information in an entertaining manner.
Conflict of Interest Disclosure: Dr. Murphy is the lead clinical faculty for ProSomnus Sleep Technologies.

Allen Ali Nasseh, DDS, MMSc ........................................... PAGE 26
Dr. Nasseh graduated from Northwestern University Dental School and Harvard School of Dental Medicine post-doctoral endodontics program, where he also received a Masters of Medical Sciences in bone physiology. Dr. Nasseh has been a clinical instructor and a lecturer at the Harvard postdoctoral endo program since 1997. Dr. Nasseh is the current endodontic editor of several national and international dental journals. He is the president and CEO of RealWorldEndo.com. Based on Google Analytics, over 2 million minutes of his educational videos were watched last year. Dr. Nasseh continues to practice clinically in Boston and has completed over 22,000 documented cases.
Conflict of Interest Disclosure: Dr. Nasseh’s ODC course is sponsored by Real World Endo. He has received material support from Brasseler USA in the last 12 months.

Daniel Petrisor, DMD, MD, FACS ........................................... PAGE 21
Dr. Petrisor is a board-certified oral and maxillofacial surgeon who practices the full scope of his specialty. He holds a dental degree from OHSU and a medical degree from the University of Texas Southwestern Medical School. Dr. Petrisor is also double fellowship trained at two of the leading institutions for oral and maxillofacial surgery training. In addition to traditional oral and maxillofacial surgery, he has a special interest in treating patients with benign and malignant tumors of the head and neck. He also has training in reconstruction of complex deformities of both hard and soft tissues. This combination of advanced training allows for a patient’s own tissues to be used for reconstructive surgery at the same time as their cancer surgery. Additionally, Dr. Petrisor is part of a team of physicians, dentists, nurses, nutritionists, therapists and social workers all working together to provide each patient the latest in comprehensive treatments for a variety of cancers of the mouth, head and neck.
Conflict of Interest Disclosure: None

Stephen Prisby ........................................... PAGE 10
Mr. Prisby is originally from Chicago and holds a BS in mass communications from Illinois State University. He has over 10 years experience in higher education, with positions in admissions and as a campus director. Mr. Prisby joined the Oregon Board of Dentistry in 2012 as the office manager and has been involved in almost every aspect of its operation. He has served as the executive director of the Oregon Board of Dentistry since 2015.

Pam Smith, RDN

Ms. Smith is a nutritionist, radio host, and industry culinary consultant who has authored 15 books on health and wellness. She provides strategic menu innovation and insight for Disney, Nike, Boeing, Cracker Barrel, and Firebirds Wood Fired Grill, and was co-creator of Bahama Breeze and Seasons 52 restaurants. Her artisanal spice blends, P.S. Flavor™, are helping to serve up delicious wellness at top restaurants and home kitchens across America. Ms. Smith has hosted all 22 years of the Epcot International Food and Wine Festival and she chairs the Culinary Institute of America’s Healthy Menu R&D Collaborative. Her “Tips for Living Well” are heard on radio nationwide.

Conflict of Interest Disclosure: None

Michelle Stafford, DDS

Dr. Stafford is the owner dentist of World of Smiles Pediatric Dentistry, with two locations in Portland. Her love for dentistry started during an internship in her childhood orthodontist’s office. She continues to pay it forward by offering this experience to area high school, college and dental students. A graduate of UCP Dugoni School of Dentistry, she completed her residency in pediatric dentistry at the Children’s Hospital of Michigan in 2008. In her free time, she enjoys traveling, crafting, and most especially spending time with her husband and their two young sons.

Conflict of Interest Disclosure: None

Christopher Verbiest

Mr. Verbiest brings almost 40 years of insurance and business experience to his role as vice president of Dentists Benefits Insurance Company (DBIC), Northwest Dentists Insurance Company (NORDIC), and Dentists Benefits Corporation (DBC). He oversees underwriting, claims, sales and marketing, and risk management operations of these organizations. Mr. Verbiest is a frequent speaker at state dental association, dental component societies, dental conferences and study clubs around the western United States. Mr. Verbiest also lectures at the dentistry schools at Oregon Health Sciences University, University of Washington, and University of Tennessee. Mr. Verbiest serves on the board of the Dental Foundation of Oregon, and enjoys spending his free time with his wife Beth and three sons.

Conflict of Interest Disclosure: Mr. Verbiest is employed by DBIC, DBC, and NORDIC.

Thomas Viola, RPh, CCP

With over 30 years experience as a pharmacist, dental educator and author, Mr. Viola has earned his reputation as the go-to specialist for delivering quality dental continuing education content through his informative, funny and engaging presentations. His sold-out programs provide an overview of the most prevalent oral and systemic diseases and the most frequently prescribed drugs used in their treatment, along with specific focus on dental considerations and strategies for implementing effective care plans.

Conflict of Interest Disclosure: None

Sidney Whitman, DDS

Dr. Whitman graduated from the New York University School of Dentistry in 1968. He completed his postgraduate studies in pediatric dentistry at Temple University School of Dentistry. Dr. Whitman works in a 130-person practice that treats children and adolescents, including Medicaid patients.

Introducing the Solutions Marketplace!

The Exhibit Hall has a new look and refined focus on what matters most to you! The Solutions Marketplace is an enhanced experience – offering the opportunity for increased connections with dental-specific partners! Come see for yourself, and take advantage of one-stop shopping for all things dental!

Plan Smart with ‘My Show Planner’!

Although wandering the Solutions Marketplace is always an option, you can get more out of the exhibit hall by taking a few minutes to visit ‘My Show Planner’ and Exhibitor Directory.

- Search company names, products & services
- Create and print a custom agenda and floor plan with all the exhibitors you don’t want to miss
- View the interactive floor plan
- Learn more about exhibitors and view to their websites
- Opt-in to interact with sales contacts directly

Find ‘My Show Planner,’ at ODC18.MapYourShow.com, or use the link on our website. There’s even a link within the ODC mobile app for quick reference.

New Dentist Reception

Friday, April 6  4 – 6 PM

Enjoy tasty hors d’oeuvres and visit with colleagues and exhibitors after CE sessions.

While this is a great opportunity for those dentists who have been practicing for 10 years or less to network, everyone is welcome and encouraged to attend.

Mobile Photo Booth

The ODC Mobile Photo Booth is back by popular demand! Instead of taking selfies, watch out for two volunteers combing the Convention Center, ready to take a photo of you with your colleagues! Silly or serious, you’ll receive an electronic copy of the photo and can view it on ODA’s Facebook and Twitter feeds.

To view your photo, visit booth 702.

Sponsored by Delta Dental of Oregon

Not yet a member of ODA?

Join today and SAVE UP TO $575 on ODC Registration!

Attending this world class conference at reduced rates is just one of the many benefits reserved for ODA members.

Oregon dentists who apply for membership by returning a completed membership application within 60 days of the ODC will receive substantial savings on conference registration.

Please register as a non-member dentist. Upon approval of active ODA membership and receipt of 2018 dues, a refund of up to $575 of the non-member registration fee will be issued.

Please contact ODA at 503.218.2010 or members@oregondental.org with any questions.
**Professional Headshot Studio**

Need to update your website, LinkedIn, Facebook, or ADA member profile photo? We are here to help!

Complimentary professional “glamour” shots will be offered in the ODA Booth, located at the back of the Solutions Marketplace, near the DFO Tooth Taxi.

*Sponsored by Oregon Dental Association*

---

**Visit the Solutions Marketplace for FREE!**

**Saturday, April 7  9:30 AM – 1 PM**

ODA members only attending the ODC to shop in the Solutions Marketplace are eligible for a free pass on Saturday, April 7.

To take advantage of this special offer, visit the on-site registration area in Pre-Function A of the Oregon Convention Center on Saturday, April 7. Advance registration is not available. Offer valid to ODA member dentists only.

---

The Dentists
Course credit
The number of continuing education credits for each course is equal to the number of hours for that course. No partial credit will be awarded. CE completion codes will be given orally only at the conclusion of each course and will not be available at any other time. It is the participant’s responsibility to verify the requirements of his or her state/provincial licensing board(s) and to self-report any CE credits earned. ODAA courses are approved for Dental Assisting National Board (DANB) continuing education credits.

Course disclaimer
The Oregon Dental Conference®, its sponsors, and the Oregon Dental Association make every effort to present high-caliber speakers in their respective areas of interest. The presentations of the speakers in no way imply endorsement of any product, technique, or service. The Oregon Dental Conference® and the Oregon Dental Association specifically disclaim responsibility for any material presented. Programs may be subject to change due to circumstances beyond our control.

Course handouts
Course handouts will be available online at www.oregondentalconference.org, and through the ODC Mobile App, starting on March 22, 2018. They will not be printed for distribution on-site. If you wish to have ODC handouts available for reference during courses, please be sure to download them in advance.

Emergencies
An emergency medical team is on-site during all conference hours. To summon emergency aid, pick up any house phone and dial the operator.

Mother’s room
The Oregon Dental Conference® offers a room on-site for nursing mothers. Please visit on-site registration for information and directions on how to access.

Non-solicitation policy
No attendee shall solicit or distribute business materials in any designated Oregon Dental Conference® meeting space, except for registered exhibitors operating within their designated booth space. Violation of this policy will result in expulsion from the meeting.

Recording policy
Recording of any type (video, audio, live streaming) is strictly prohibited within Oregon Dental Conference® continuing education sessions.

Registration materials
Confirmation of registration will be sent to individual registrants after processing. A packet containing name badges for all participants will be mailed prior to the conference to all primary registrants who register by February 23, 2018. Those registering after February 23 may pick up their name badge in the Holladay Lobby of the Oregon Convention Center during registration hours (listed on page 43).

Special needs
If you need any special assistance, please let us know ahead of time how we can help you. Please indicate your needs when registering for the conference, or contact the ODA at 503.218.2010 or odc@oregondental.org. The Oregon Convention Center complies with the accessibility requirements of the Americans with Disabilities Act.

Seminar seating
All attendees must select their courses during registration to ensure there is adequate seating. Room assignments will be based on preregistration numbers. Due to fire code regulations, once a course is full, attendees will not be allowed to sit on the floor or bring chairs from another room. For workshops and courses with limited seating, there will be a 5-minute grace period before your seat is released to a waitlisted attendee. Please set all electronic devices to ‘silent’ during courses.
Lodging Options

The following hotels have special ODC rates that are available on a first-come, first-serve basis until March 15, 2018. For reservations, please call the hotel directly.

When making reservations, please mention that you are attending the Oregon Dental Conference® and be sure to indicate your housing plans during the registration process. Travel Portland prioritizes requests for future conference dates depending on the total hotel rooms used by conference attendees.

Lodging

Headquarters Hotel

DoubleTree by Hilton Hotel Portland
1000 NE Multnomah St
Portland, OR 97232

OregonDentalConference.org

Visit our website and click “Lodging & Transportation” for links to each of our partner hotels, with conference codes already in place.

This page will also provide you with transportation and parking information, as well as links to Tri-Met and our venue, the Oregon Convention Center.

Your partner in oral health

Since 1955, Delta Dental of Oregon has been supporting the dental community and working together to help organizations unleash their smile power.

Delta Dental is part of the Moda, Inc. family of companies.
Join us for Friday’s General Session!

**CHANGE THE GAME**
Reduce Stress to Boost Morale & Teamwork!

For almost two decades, Tim Gard has been connecting with audiences from Texas to Tasmania, cracking them up with his entertaining, instructive presentations.

Tim is a tears-in-your-eyes funny speaker who teaches people to be more resilient and resourceful, and coaches businesses on how to enhance productivity and employee enthusiasm. An internationally recognized authority on stress reduction and conflict resolution, Tim’s easy-to-implement techniques provide audiences with ways to diffuse, deal with, and even avoid intensely stressful encounters.

**Friday, April 6, 7:30 – 8:30 AM**
RECOMMENDED FOR: Entire Dental Team
COURSE NUMBER: 9190
NOTE: The General Session does not qualify for CE credit.

**Casino Night**

After a day of learning, gather your team for an evening of fun! This event has something for everybody – dinner, drinks, music, dancing, casino games, and fantastic prizes.

Join in the fun by adding a ticket to your conference registration. All are welcome and encouraged to attend!

This event is graciously sponsored, in part, by:

This event is for ALL members of the dental team.
HOW TO REGISTER
for the 2018 Oregon Dental Conference®

Online at OregonDentalConference.org
The quickest, easiest, and most cost-effective way to register is online at www.oregondentalconference.org.
✔ Finalize your schedule instantly
✔ Secure your place in limited-attendance sessions immediately

By Mail or Fax
Download the registration form at www.oregondentalconference.org.
Print the form, complete it, and return via fax or mail with your payment. Please be advised that there is a $25 processing fee for faxed or mailed registrations.

On-Site at ODC
Registration will be available in Pre-Function A at the Oregon Convention Center during the hours listed below. Dentists who are not members of ODA will need to show their ADA card to receive the ADA member rate.

Thursday, April 5 7 AM – 6 PM
Friday, April 6 7 AM – 6 PM
Saturday, April 7 7 AM – 1 PM

Registration materials
Confirmation of registration will be sent to individual registrants after processing. A packet containing name badges for all participants will be mailed prior to the conference to all primary registrants who register by February 23, 2018. Those registering after February 23 may pick up their name badge in the Holladay Lobby of the OCC during registration hours.

Refunds, transfers, and cancellations
All refund, transfer, and cancellation requests must be submitted in writing. If cancellation occurs after preregistration materials have been mailed, badge(s) must be returned with the written request. A $25 handling fee will be charged for all refunds. Refund requests will not be granted, for any reason, after 11:59 pm on March 23, 2018.

Early Bird Deadline: February 23, 2018
Register by February 23 for early bird pricing and to receive your conference materials prior to ODC.

Mail/Fax Deadline: March 23, 2018
If you are registering after March 23, you must register online at oregondentalconference.org, or on-site in Pre-Function A of the Oregon Convention Center, April 5–7.
