

Successful dental practices get their data right, and get it right now, all while eliminating paper forms.

Missing or incorrect data for dental practices can be devastating, and could result in catastrophic consequences for your patients. **Field2Base** Mobile Forms™ eliminates slow, costly, and error-filled paper forms. Our turnkey, customizable mobile solution is perfect for completely eliminating the use of paper forms in dental offices.

Make your current forms work harder for you.

With our *Mobile Forms*™, it's easy. This intuitive software platform lets you turn your paper-based forms into digital versions for use in the field. You can even convert government-mandated items such as Medicare and Medicaid applications into digital forms to ensure accuracy and to improve billing. Using Field2Base, you can include enhanced data such as photographs of insurance cards, videos, signature capture, and more. *Mobile Forms* also allows you to build business rules into each field to ensure they are filled out completely and correctly the first time, every time.

Transmit data reliably and securely.

Our patented technology takes the guesswork out of mobility. All data is secured on the device and in transit using 256bit AES and 128bit SSL encryption technologies and in accordance with HIPAA and HITECH guidelines. Data is routed through our secure cloud which is independently certified for SAS70 and SSAE16 compliance and offers 99.999% availability.

Manage your data.

Mobile Forms PLUS Workflow provides office managers with a secure online portal to review, edit, and approve digital forms as they are submitted. You can ensure data compliance with insurance providers and speed up your A/R cycles, and all changes are tracked and stored for audit purposes in accordance with HIPAA guidelines. Approved forms can be delivered as an email with attached PDF, accessed online in **Field2Base**'s secure cloud, or integrated with your current EMR/IT system(s) using our integration software. Need to get information out to your users? **Field2Base** allows you to dispatch work orders/visit information to your mobile workforce as prefilled forms.

There's so much more we can show you, including the impressive ROI.

Research shows that mobile automation has a substantial and immediate ROI—up to 700% for the most successful projects. Let us show you how we can help you achieve this.
